Configuring ArchestrA Security for InBatch

All Tech Notes, Tech Alerts and KBCD documents and software are provided "as is" without warranty of any kind. See the **Terms of Use** for more information.

Topic#: 002781
Created: April 2013

Introduction

This *Tech Note* describes the procedure for configuring ArchestA Security inside of InBatch.

Application Version

- InBatch 9.x

Prerequisites

- ArchestrA Security-enabled users configured and ready to be mapped to InBatch Security.

- Ensure that proper license is installed for System Platform.

- A Platform must be deployed to the InBatch Server Node in order to use ArchestrA Security for InBatch.

- The IDE must also be installed to browse the Galaxy name space. Otherwise, Galaxy attributes and users must be mapped manually.

Procedure

1. Ensure that in TagLinker under Edit/Access Names, the **GR Node Name** and **Galaxy Name** are configured as shown in Figure 1 (below).

2. Make sure that you click **Change** in Figure1 and also validate the TagLinker (**File/Validate from TagLinker**).
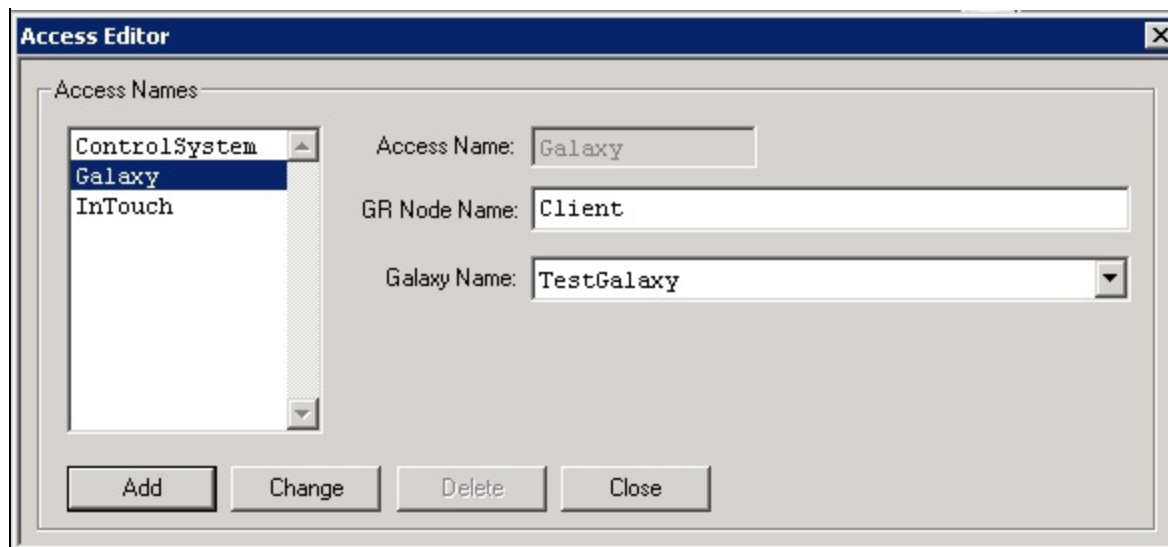

FIGURE 1: ACCESS NAMES FOR THE GALAXY NODE AND GALAXY NAME

If the Access names are not configured correctly, starting the Security Editor will generate the following message (Figure 2 below).
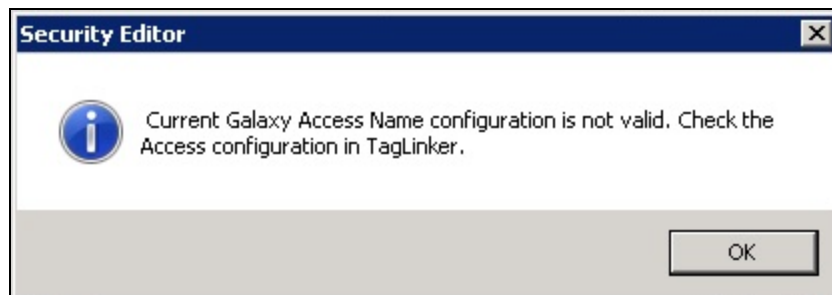

FIGURE 2: SECURITY EDITOR MESSAGE WHEN ACCESS NAMES ARE INCORRECT

3. Start the Security Editor from the Environment Display.

4. Login using **system/system** for username/password. The **Security Editor** appears (Figure 3 below).

FIGURE 3: INBATCH SECURITY EDITOR

5. Click the **ArchestrA** option (Figure 3 above), then click **Change**. The following message appears.
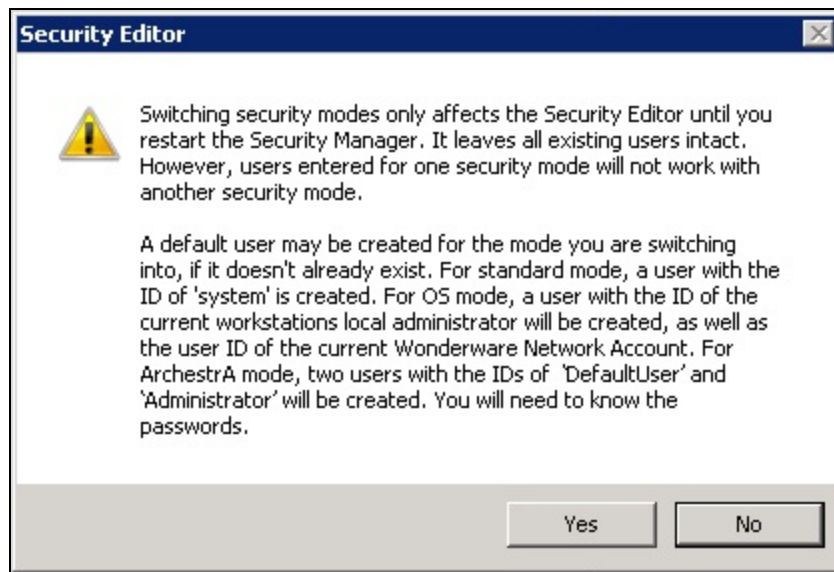

FIGURE 4: CHANGING THE SECURITY MODE

6. Click **Yes** and close the Security Editor.

Note: Changing the Security Mode requires restarting the Environment Display. Clicking **File/Exit-Shutdown** from the Environment Display and restarting the Environment Display restarts InBatch Security Manager.

7. Launch the Security Editor from Environment Display. Login to the Security Editor using Administrator/Password that you use for ArchestrA Security. The **Security Editor** window appears.

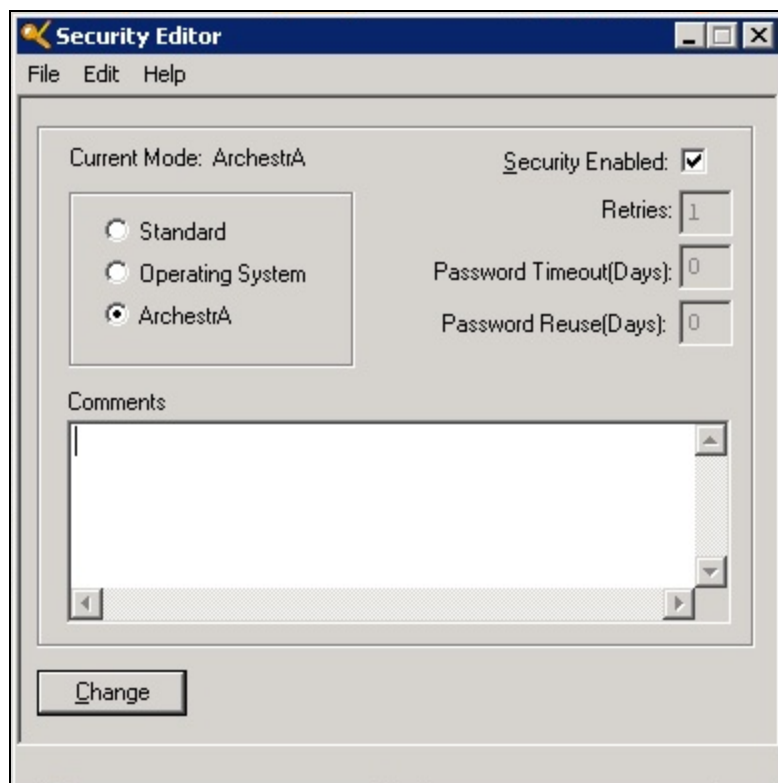

FIGURE 5: SECURITY EDITOR

8. Click **Edit/UserGroups-Accounts**. The User/Group Account Editor appears (Figure 6 below).
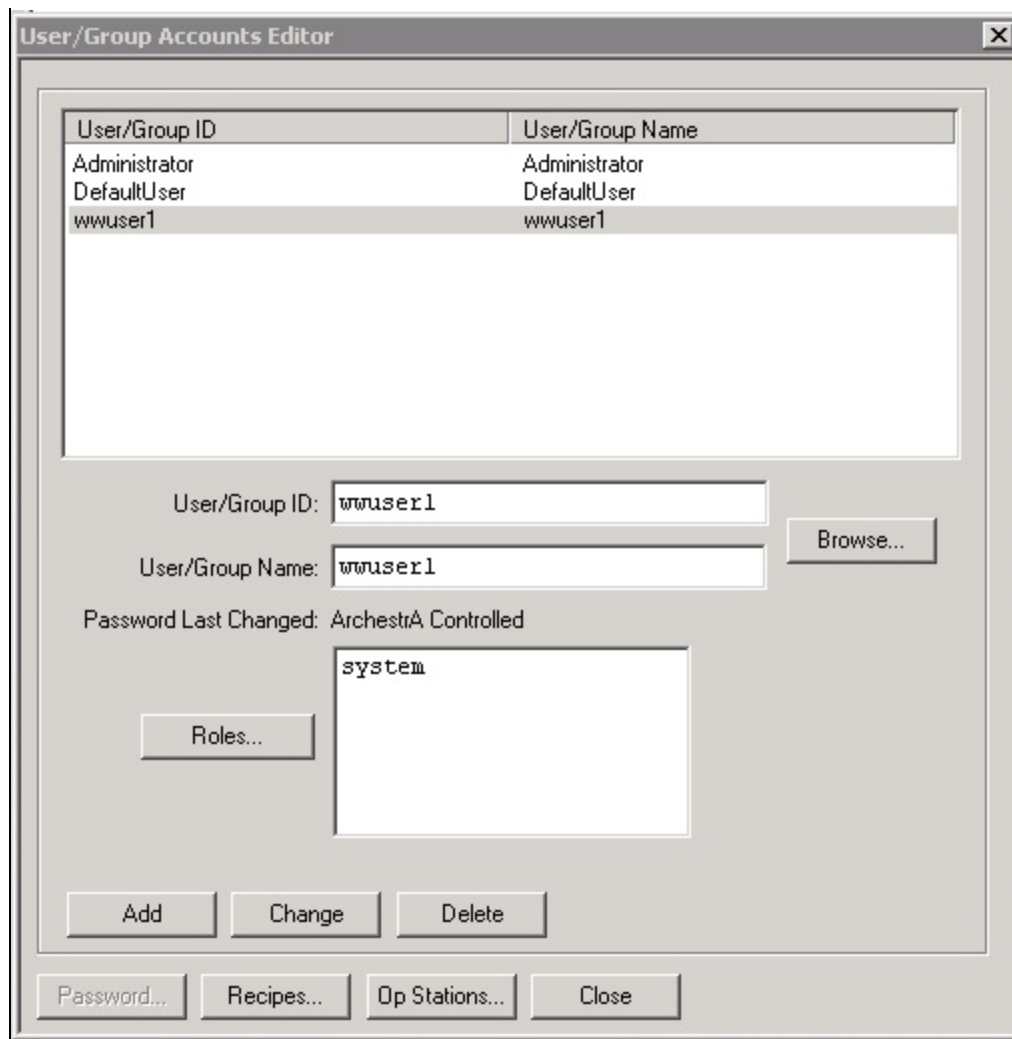

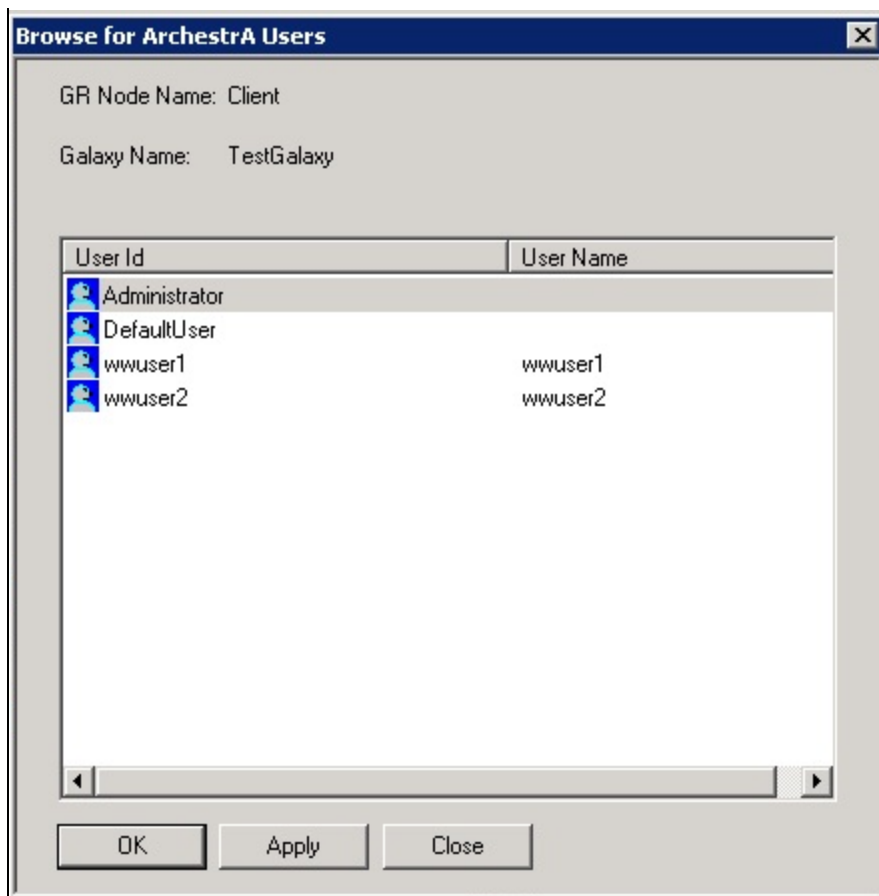

FIGURE 6: USER/GROUP ACCOUNTS EDITOR

9. Click the **Browse** button. The **Browse for Archestra Users** window appears (Figure 7 below).

FIGURE 7: BROWSE FOR ARCHESTRA USERS

Note: The rest of the configuration is same as for Standard InBatch Users. If you experience problems, contact Invensys Support.
