

CP Series REMOTE PHOSPHOR CANOPY LIGHT

The CP80 Remote Phosphor Canopy luminaire uses a silicone remote phosphor engine module to create a light pattern that matches traditional under canopy lights - producing approximately 15% up-light to eliminate the "cave effect". This light source also reduces glare and provides a pleasing familiar light appearance. The fixture is easy to install and can be opened without tools. Remote Phosphor capabilities equate to higher efficacy, improved ROI, and lasting benefits for your organization.

FEATURES:

- Instant strike
- -40°C to 45°C ambient temperature
- Low glare and uniform light distribution
- Universal AC input
- Outdoor / wet location rated
- Made in USA with global components

BENEFITS:

- Tool-less entry
- Up to 30% higher system efficacy compared to conventional LEDs
- Longer lifetime
- Wired / wireless control options
- No mercury
- 5 year warranty
