

XLE MODEL

MODEL 2: Rev T or Later 12 DC In, 6 Relay Out, 4 - 12-bit Analog In

XLT MODEL

1 TECHNICAL SPECIFICATIONS

1.1 General		
Primary Power Range	10-30VDC	
Required Power (Steady State)	130mA @ 24VDC	
Inrush Current	30mA for < 1ms	
Typical power: Backlight 100%	267mA @ 10V (2.67W) 121mA @ 24V (2.90W)	
Power: Backlight Off	15mA @ 24V (0.36W)	
Power: Ethernet Models	35mA @ 10V (0.35W) 20mA @ 24V (0.48W)	
-22 Heater Option	250mA @ 24VDC with Heater Operating Heater option - Model# plus "-22"	
Real Time Clock	Battery backed; lithium coin cell CR2450	
Clock Accuracy	+/- 90 Secs/Month	
Relative Humidity	5 to 95% Non-condensing	
Operating Temp.	-10°C to +60°C	
-22 Heater Option	-40°C to +50°C	
Storage Temp.	-20°C to +70°C	
Weight	0.75 lbs/340 g (without I/O)	
Altitude	Up to 2000m	
Rated Pollution Degree	Evaluated for Pollution 2 rating	
Certifications (UL/CE)	USA: https://hornerautoma- tion.com/certifications/ Europe: http://www.horn- er-apg.com/en/support/certifi- cation.aspx	

1.2 User Interface		
Display Type	Transflective LCD Sunlight Readable	
Resolution	128 x 64 pixels (XLE) 160 x 128 pixels (XLT)	
Color	Monochrome	
Built-In Storage	16MB	
User-Program. Screens	1023 max pages; 50 objects per page	
Backlight	LED	
Backlight Lifetime	30,000+ hrs	
Brightness Control	0-100% (XLT) On/Off (XLE) via Sys- tem Register %SR57	
Number of Keys	20 (XLE) 5 (XLT)	
Touchscreen (XLT)	Resistive 1,000,000+ touch life	

1.4 Control & Logic			
Control Lang. Support	Advanced Ladder Logic Full IEC 61131-3 Languages		
Logic Program Size	256kB		
Scan Rate	0.7ms/kB logic (XLE) 0.8ms/kB logic (XLT)		
Digital Inputs	2048		
Digital Outputs	2048		
Analog Inputs	512		
Analog Outputs	512		
Gen. Purpose Registers	9,999 (words) Retentive 2,048 (bits) Retentive 2,048 (bits) Non-retentive		

1.3 Connectivity			
Serial Ports	RS-232 full handshaking or RS-485 half duplex on first Modular Jack (MJ1) RS-232 or RS-485 on second Modular Jack (MJ2)		
USB mini-B	Programming only		
CAN	1x CAN Port, Isolated 1kV		
CAN Protocols	CsCAN, CANopen, DeviceNet, J1939		
Ethernet	Ethernet versions only		
Ethernet Protocols	TCP/IP, Modbus TCP, FTP, SRTP, EGD, ICMP, ASCII		
Remote I/O	SmartRail, SmartStix, SmartBlock, SmartMod		
Removable Memory	microSD, SDHC, SDXC IN FAT32 format, support for 32 GB max. Application Updates, Datalogging, more		
Audio (XLT only)	Beeper, System or Software Controlled		

1.5 High-Speed Inputs			
Number of Counters	4		
Maximum Frequency	500kHz each		
Accumulator Size	32-bits each		
Modes Supported	Totalizer, quadrature, pulse measurement, frequency measurement, set-point controllled outputs		

XLE/XLT User Manual [MAN0878]

The User Manual includes extensive information on:

- Built-In I-O
- Common %S & %SR Registers
- HSC/PWM/Totalizer/Quadrature & Accumulator Registers
- Resource Limits

tecnical specifications continued on next page...

technical specifications continued...

1.6 Digital DC Inputs			
Inputs per Module	12 Including 4 Configurable HSC Inputs		
Commons per Module		1	
Input Voltage Range	12VDC / 24VDC		
Absolute Max. Voltage	35VDC Max.		
Input Impedance	10kΩ		
Input Current: Upper Threshold Lower Threshold	Positive Logic: 0.8mA 0.3mA	Negative Logic: -1.6mA -2.1mA	
Max. Upper Threshold	ld 8VDC		
Min. Lower Threshold	3VDC		
OFF to ON Response	1ms		
ON to OFF Response	1ms		
High Speed Counter Max Freq*	500kl	Hz Max	

^{*}See I/O info below for detail regarding HSC and PWM

1.7 Digital Relay Outputs			
Outputs per Module	6 Relay		
Commons per Module	6		
Max. Output Current per Relay	3A @ 250VAC, resistive		
Max. Total Output Current	5A continuous		
Max. Output Voltage	275VAC, 30VDC		
Max. Switched Power	1000VAC, 150 W		
Contact Isolation to Ground	1000VAC		
Max. Voltage Drop at Related Current	0.5V		
Expected Life (see below derating chart for detail)	No Load: 5,000,000 Rated Load: 100,000		
Max. Switching Rate	300 CPM at no load 20 CPM at rated load		
Туре	Mechanical Contact		
Response Time	One update per ladder scan plus 10ms		

1.8 Analog Inputs	, Medium Resolution	
Number of Chan- nels	4	
Input Ranges	0-10VDC, 0-20mA, 4-20mA	
Safe Input Voltage Range	-0.5V to 12V	
Input Imped- ance (clamped @ -0.5VDC to 12 VDC)	Current Mode: 100Ω Voltage Mode: 500 k Ω	
Nominal Resolution	12 Bits	
%Al Full Scale	10V, 20mA, 100mV: 32,000 counts full scale	
Max. Over Current	35mA	
Conversion Speed	Once per Ladder Scan	
Max Error at 25°C (excluding Zero) Adjusting Filtering may improve error	4-20mA 1.00% 0-20mA 1.00% 0-10VDC 1.50%	
Filtering	160Hz Hash (noise) Filter, 1-128 Scan Digital Running Average Filter	

2 CONTROLLER OVERVIEW

2.1 - Overview of XLE and XLT

- **Function Keys**
- Softkeys
- Navigation Keys
- Touchscreen
- Wide Range DC Powser
- CAN Port
- Mounting Clip Locations RS232/RS485 Serial Ports (2)
- USB Mini-B Port
- 10. Ethernet LAN Port (optional)
- 11. Optional Built-In I/O
- Configuration Switches 11.
- 12. High Capacity microSD Slot
 13. Configuration Switches
- 14. DIN Rail Clip

NOTE: See Precaution #12 on page 6 about USB and grounding.

2.2 Power Wiring

Primary Power Port Pins			
PIN	SIGNAL	DESCRIPTION	
1	Ground	Frame Ground	
2	DC-	Input Power Supply Ground	
3	DC+	Input Power Supply Voltage	

DC Input / Frame

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm).

Strip Length: 0.28" (7mm).

Torque Rating: 4.5 - 7 in-lbs (0.50 - 0.78 N-m).

DC- is internally connected to I/O V-, but is isolated from CAN V-.

A Class 2 power supply must be used.

page 2 of 6

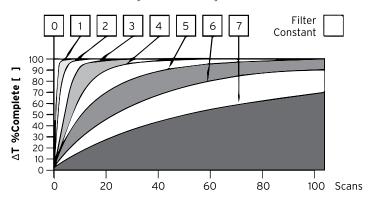

3 Wiring: Inputs and Outputs

3.1 - Analog Inputs Information

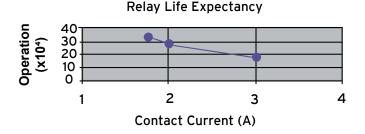

Raw input values for channels 1-4 are found in the registers as Integer-type data with a range from 0 - 32000.

Analog inputs may be filtered digitally with the Filter Constant found in the Cscape Hardware Configuration for Analog Inputs. Valid filter values are 0 - 7 and act according to the following chart.

Data Values		
INPUT MODE:	DATA FORMAT, 12-bit INT:	
0-20mA, 4-20mA	0-32000	
0-10V	0-32000	

3.2 - Relay Life

WARNING: Exposure to some chemicals may degrade the sealing properties of materials used in the Tyco relay PCJ.

Cover/Case & Base: Mistubishi engineering Plastics Corp. 5010GN6-30 or 5010GN6-30 M8 (PBT)

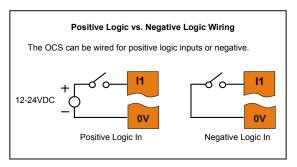

Sealing Material: Kishimoto 4616-50K (I part expoxy resin)

It is recommended to periodically inspect the relay for any degradation of properties and replace if necessary.

Wiring Details:

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm²).
Strip Length: 0.28" (7mm).
Torque Rating: 4.5 - 7 in-lbs (0.50 - 0.78 N-m).

3.3 - Digital Inputs

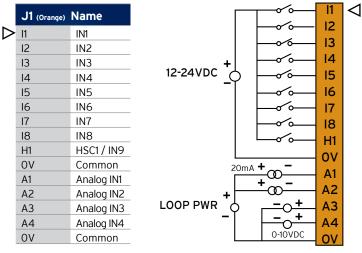

Digital inputs may be wired in either a Positive Logic or Negative Logic fashion as shown. The setting in the Cscape Hardware Configuration for the Digital Inputs must match the wiring used in order for the correct input states to be registered. No jumper settings are required for XLE/XLT. When used as a normal input and not for high speed functions, the state of the input is reflected in registers %II - %II2.

Digital inputs may alternately be specified for use with High Speed Counter functions, also found in the Hardware Configuration for Digital Inputs. Refer to the XLE/XLT User Manual (MANO878) for full details.

3.4 - Wiring Connectors

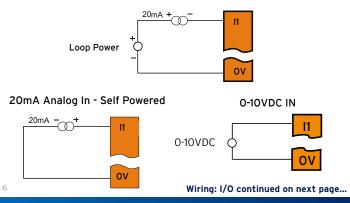

J1 Wiring - Digital In / Analog In

NOTE: The OV terminals are internally connected.

3.5- 20mA Connections

20mA Analog In - Not Self Powered

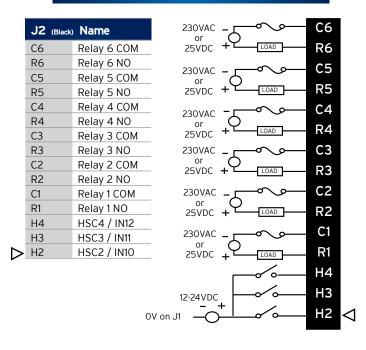

Indianapolis, USA | Cork, Ireland | Calgary, Canada | Bangalore, India | Oakleigh, Australia | Tianjin, China | Esteio, Brazil

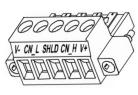

wiring: I-O continued...

J2 Wiring- Relay Out / Analog Digital In

4 COMMUNICATIONS

4.1 - CAN Communications

	CAN	l Pin Assignments		
	PIN	SIGNAL	DESCRIPTION	
	1	V-	CAN Ground - Black	
	2	CN L	CAN Data Low - Blue	
ı	3	SHLD	Shield Ground - None	
	4	CN H	CAN Data High - White	
	5	V+ (NC)	No Connect - Red	

CAN

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm).

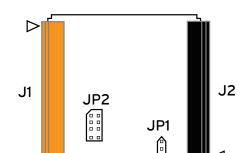

Strip Length: 0.28" (7mm).

Locking spring-clamp, two-terminators per conductor.

Torque Rating: 4.5 in-lbs (0.50 N-m).

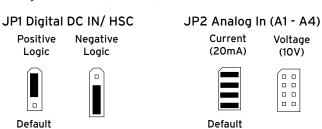

V+ pin is not internally connected, the SHLD pin is connected to Earth ground via a $1M\Omega$ resistor and 10 nF capacitor.

4.2 - Serial Communications

3.5 - Jumper Settings for Model 2

Location of I/O jumpers (JP1 & JP2) and wiring connectors (J1 & J2) with back cover removed.

NOTE: The Cscape Module Configuration must match the selected I/O (JP) jumper settings.

(Cscape Path: Controller -> Hardware Configuration -> Local I/O -> Config -> Module Setup -> Analog In)

NOTE: When using JP2 (A1-A4), each channel can be independently configured.

MJ1: RS-232 w/full handshaking or RS-485 half-duplex

RS-485 termination via switches; biasing via software

MJ1 PINS		
PIN	SIGNAL	DIRECTION
8	TXD	OUT
7	RXD	IN
6	OV	GROUND
5	+5V @ 60mA	OUT
4	RTS	OUT
3	CTS	IN
2	RX-/TX-	IN/OUT
1	RX+/TX+	IN/OUT

MJ2 SERIAL PORT

MJ2: RS-232 or RS-485 half or full-duplex, software selectable

RS-485 termination via switches; biasing via software

MJ2 PINS			
PIN	SIGNAL	DIRECTION	
8	232 TXD	OUT	
7	232 RXD	IN	
6	OV	Ground	
5	+5V @ 60mA	OUT	
4	485 TX-	OUT	
3	485 TX+	OUT	
2	485 RX- or RX/TX-	IN or IN/OUT	
1	485 RX+ or RX/TX+	IN or IN/OUT	

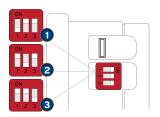

page 4 of 6

Communications continued on next page...

communications continued...

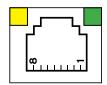

4.3 - Dip Switches

The DIP switches are used to provide a built-in termination to both the MJ1 port and MJ2 port if needed. The termination for these ports should only be used if this device is located at either end of the multidrop/daisychained RS-485 network.

DIP SWITCHES			
PIN	NAME	FUNCTION	DEFAULT
1	MJ1 RS-485 Termination	ON = Terminated	OFF
2	MJ2 RS-485 Termination	ON = Terminated	OFF
3	Bootload	Always Off	OFF

4.4 - Ethernet Communications

Green LED indicates link - when illuminated, data communication is available.

Yellow LED indicates activity - when flashing, data is in transmission.

5 BUILT-IN I/O

5.1 - Built-in I/O for XLE/XLT - Model 2

The I/O is mapped into OCS Register space, in three separate areas – Digital/Analog I/O, High-Speed Counter I/O, and High-speed Output I/O. Digital/Analog I/O location is fixed starting at 1, but the high-speed counter and high-speed output references may be mapped to any open register location. For more details on using the high-speed counter and high-speed outputs, see the XLE/XLT OCS User's Manual (MANO878).

Digital and Analog I/O Functions			
Digital Inputs	%11-12		
Reserved	%l13-32		
ESCP Alarm	n/a		
Digital Outputs	%Q1-6		
Reserved	%Q7-24		
Analog Inputs	%AI1-4		
Reserved	%AI5-12		
Analog Outputs	n/a		
Reserved	n/a		

6 INSTALLATION DIMENSIONS

6.1 - XLE/XLT - Dimensions

6.2 - Installation Procedure

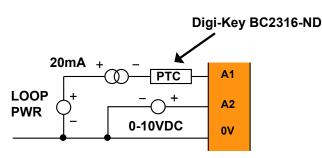

- The XLE/XLT utilizes a clip installation method to ensure a robust and watertight seal to the enclosure. Please follow the steps below for the proper installation and operation of the unit.
- This equipment is suitable for Class I, Division 2, Groups A, B, C and D or non-hazardous locations only.
- Digital outputs shall be supplied from the same source as the operator control station.
- Jumpers on connector JP1 shall not be removed or replaced while the circuit is live unless the area is known to be free of ignitable concentrations of flammable gases or vapors.
- Carefully locate an appropriate place to mount the XLE/XLT. Be sure to leave enough room at the top of the unit for insertion and removal of the microSD™ card.
- Carefully cut the host panel per the diagram, creating a 92mm x 92mm +/-0.1mm opening into which the XLE/XLT may be installed. If the opening is too large, water may leak into the enclosure, potentially damaging the unit. If the opening is too small, the OCS may not fit through the hole without damage.
- 3. Remove any burrs and or sharp edges and ensure the panel is not warped in the cutting process.
- Remove all Removable Terminals from the XLE/XLT. Insert the XLE/XLT through the panel cutout (from the front). The gasket must be between the host panel and the XLE/XLT.
- Install and tighten the four mounting clips (provided in the box) until the gasket forms a tight seal (NOTE: Max torque 0.8 to 1.13 Nm, or 7-10 in-lbs).
- Reinstall the XLE/XLT I/O Removable Terminal Blocks. Connect communications cables to the serial port, USB ports, Ethernet port, and CAN port as required.

page 5 of 6

ANALOG INPUT TRANZORB FAILURE

A common cause of Analog Input Tranzorb Failure on Analog Inputs Model 2, 3, 4 & 5: If a 4-20mA circuit is initially wired with loop power, but without a load, the analog input could see 24VDC. This is higher than the rating of the tranzorb. This can be solved by NOT connecting loop power prior to load connection, or by installing a low-cost PTC in series between the load and analog input.

SAFETY

8.1 - WARNINGS

- To avoid the risk of electric shock or burns, always connect the safety (or earth) ground before making any other connections.
- To reduce the risk of fire, electrical shock, or physical injury, it is strongly recommended to fuse the voltage measurement inputs. Be sure to locate fuses as close to the source
- Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards
- In the event of repeated failure, do NOT replace the fuse again as repeated failure indicates a defective condition that will NOT clear by replacing the fuse.

 Only qualified electrical personnel familiar with the construction and operation of this
- equipment and the hazards involved should install, adjust, operate, or service this equipment. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury or loss
- WARNING Battery may explode if mistreated. Do not recharge, disassemble, or dispose of
- WARNING EXPLOSION HAZARD Batteries must only be changed in an area known to be non-hazardous.

8.2 - FCC COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation

8.3 - PRECAUTIONS

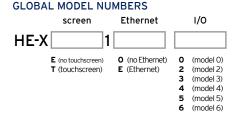

All applicable codes and standards need to be followed in the installation of this product. Adhere to the following safety precautions whenever any type of connection is made to the module:

- Connect the safety (earth) ground on the power connector first before making any other connections.
- When connecting to the electric circuits or pulse-initiating equipment, open their related breakers.
- Do NOT make connection to live power lines.
- Make connections to the module first; then connect to the circuit to be monitored.
- Route power wires in a safe manner in accordance with good practice and local codes.
- Wear proper personal protective equipment including safety glasses and insulated gloves when making connections to power circuits.
- Ensure hands, shoes, and floor are dry before making any connection to a power line. Make sure the unit is turned OFF before making connection to terminals.
- Make sure all circuits are de-energized before making connections
- 10 Before each use, inspect all cables for breaks or cracks in the insulation. Replace immediately if defective.
- Use copper conductors in Field Wiring only, 60/75°C.
- Use caution when connecting controllers to PCs via serial or USB. PCs, especially laptops, may use "floating power supplies" that are ungrounded. This could cause a damaging voltage potential between the laptop and controller. Ensure the controlle and laptop are grounded for maximum protection. Consider using a USB isolator due to voltage potential differences as a preventative measure.

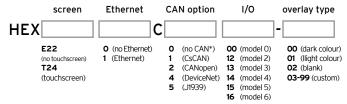

9 BATTERY

The XLE/XLT uses a replaceable non-rechargeable 3V Lithium coincell battery (CR2450) to run the Real-Time Clock and to keep the retained register values. This battery is designed to maintain the clock and memory for 7 to 10 years. Please reference MAN0878 providing instructions on how to replace the battery.

10 PART NUMBER BUILDER
