XLW Prime Datasheet

Model 0 - No Built-In I/O

MAN1338-22-EN_XLWP_Mod0

Part Numbers

Global Part Number	HE-XPLWE0
European Part Number	HEXP381C100

User Manual and Add-Ons

Find the documents via the Documentation Search.

Part #	Description
MAN1256	EXLW & XLW Prime User Manual
MAN1142	Rechargeable Battery Manual
HE-BAT019	Rechargeable 3.6V Lithium Battery
HE-XCK	Programming Cables
HE-XDAC	2 channel Analog Output I/O option kit, selectable 0-10V, +/-10V, 4-20mA.
HE-XDAC107	4 channel Analog Output I/O option kit, selectable 0-10V, +/-10V, 4-20mA.
HE-XKIT	Blank I/O Board
HE200MJ2TRM	Adapter, RJ45 (8P8C) male to 8-position terminal strip.
HE-FBD001	Ferrite core for filtering out electrical noise.

Battery Maintenance

The XLW Prime uses a Renata CR2032 lithium battery to run the Real Time Clock. The battery life is 7-10 years.

TECHNICAL SPECIFICATIONS

General Specifications

Typical Power Back-light 100%	415mA @ 10VDC (4.15W) 191mA @ 24VDC (4.58W)
Power Backlight @ 50%	111mA @ 24VDC (2.66W)
Power Backlight OFF	105mA @ 24VDC (2.52W)
Required Power (Inrush)	25A for < 1ms @ 24VDC, DC switched
Primary Power Range	10 - 30VDC
Max. Current	1000mA, Class 2
Relative Humidity	5 to 95%, Non-Condensing
Clock Accuracy	+ / - 20 ppm maximum at 25°C (+/- 1 min/month)
Real Time Clock	Battery Backed, Lithium Coin
Operating Temperature	-10°C to +60°C
Storage Temperature	-20°C to +60°C
Weight	3.9375 lbs (1786g)
Altitude	Up to 2000m
Rated Pollution Degree	Degree 2 Rating
Certifications (UL/CE)	North America or Europe
Enclosure Type	1, 3R, 4, 4X, 12, 12K & 13

Control and Logic

Control Lang. Support	Register-Based Advanced Ladder Logic; Variable-Based Advanced Ladder IEC 61131-3 Languages
Logic Program Size	2MB, maximum
Scan Rate	.02ms/kB
Digital Inputs	2048
Digital Outputs	2048
Analog Inputs	512
Analog Outputs	512
Gen. Purpose Registers	50,000 (words) Retentive 16,384 (bits) Retentive 16,384 (bits) Non-retentive

User Interface

Display Type	7” TFT Color
Resolution	800 x 480
Color	16-bit (65,536)
Screen Brightness	420 nits
Screen Memory	17MB
User-Program. Screens	1023 max pages; 1023 objects per page
Backlight	LED - 50,000 hour life

Connectivity

Serial Ports	1 RS-232 & 1 RS-485 on first Modular Jack (MJ1/2) 1 RS-232 or 1 RS-485 on second Modular Jack
USB mini-B	USB 2.0 (480MHz) Pro-gramming & Data Access
USB A (500mA max)	USB 2.0 (480MHz) for USB flash drives (2TB)
CAN Port Isolated 1kV	Remote I/O, Peer-to-peer Comms, Cscape
CAN Protocols	CsCAN, CANopen, DeviceNet, J1939
Ethernet	10/100 Mb (Auto-MDX)
Ethernet Protocols	TCP/IP, Modbus TCP, FTP, SMTP, EGD, ICMP, ASCII
Remote I/O	SmartRail, SmartStix, SmartB-lock, SmartMod
Removable Memory	microSD, SDHC, SDXC IN FAT32 format, support for 32GB max. Application Updates, Data-logging

USB Webcams

USB Webcams supported should support the UVC (USB Video class) protocol for the OCS to be able to display video. Most USB based video devices support this today. Special feature such as zoom and high definition are not supported by the OCS

CONTROLLER OVERVIEW

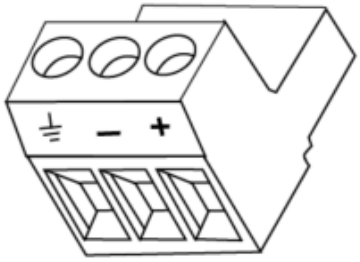
Overview of OCS

1. Touchscreen
2. USB 2.0 “A”: Flash Drive
3. LAN Port
4. PWR: 10-30VDC In
5. CAN Port
6. MJ3: RS-232/485
7. Dip Switches
8. MJ1/MJ2: RJ45 Serial Port
9. microSD: Data Storage
10. USB mini “B”: Programming

NOTE: Use caution when connecting controllers to PCs via serial or USB. PCs, especially laptops may use “floating power supplies” that are ungrounded. This could cause a damaging voltage potential between the laptop and controller. Ensure the controller and laptop are grounded for maximum protection. Consider using a USB isolator due to voltage potential differences as a preventative measure.

Power Wiring

NOTE: The Primary Power Range is 10VDC to 30VDC.



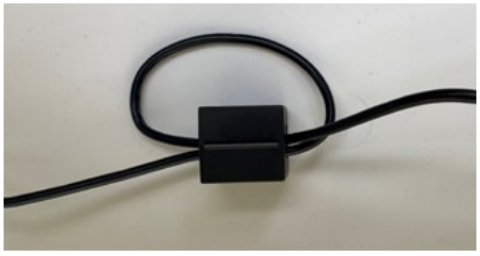
Primary Power Port Pins		
PIN	**Signal**	**Description**
1	Ground	Frame Ground
2	DC-	Input Power Supply Ground
3	DC+	Input Power Supply Voltage

DC Input / Frame

- Solid/Stranded Wire: 12-24 awg (2.5-0.2mm)
- Strip length: 0.28” (7mm)
- Torque, Terminal Hold-Down Screws: 4.5 – 7 in-lbs (0.50 – 0.78 N-m)
- DC- is internally connected to I/O V-, but is isolated from CAN V-. A Class 2 power supply must be used.

Power Up

1. **OPTION**: Attach ferrite core with a minimum of two turns of the DC+ and DC- signals from the DC supply that is powering the controllers.

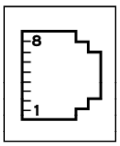


2. Connect to earth ground.
3. Apply recommended power.

COMMUNICATIONS

Serial Communication

MJ1/2 Serial Ports



MJ1/2 Independent Serial Ports

MJ1: RS-232 w/Full Handshaking
MJ2: RS-485 Half-Duplex

	MJ1 PINS		MJ2 PINS	
PIN	**SIGNAL**	**DIRECTION**	**SIGNAL**	**DIRECTION**
8	TXD	OUT	--	--
7	RXD	IN	--	--
6	0V	GROUND	0V	GROUND
5	+5V @ 60mA	OUT	+5V @ 60mA	OUT
4	RTS	OUT	--	--
3	CTS	IN	--	--
2	--	--	RX- / TX-	IN / OUT
1	--	--	RX+ / TX+	IN / OUT

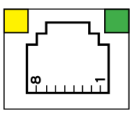
MJ3 Serial Port

2 Multiplexed Serial Ports on One Modular Jack (8 posn)

	MJ3 PINS	
PIN	**SIGNAL**	**DIRECTION**
8	TXD RS232	OUT
7	RXD RS232	IN
6	0V	GROUND
5	+5V @ 60mA	OUT
4	TX- RS485	OUT
3	TX+ RS485	OUT
2	RX- RS485	IN
1	RX+ RS485-	IN

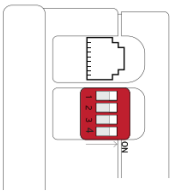
NOTE: Attach optional ferrite core with a minimum of two turns of serial cable.

Ethernet



Green LED indicates link - when illuminated, data communication is available.
Yellow LED indicates activity - when flashing, data is in transmission.

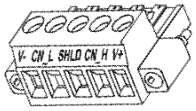
Dip Switches



DIP Switches			
PIN	**NAME**	**FUNCTION**	**DEFAULT**
1	MJ3 RS-485 Termination	ON = Terminated	OFF
2	MJ3 Duplex	ON = Half OFF = Full	OFF
3			OFF
4	MJ2 RS485 Termination	ON = Terminated	OFF

The DIP switches are used to provide a built-in termination to both the MJ1, MJ2 & MJ3 ports if needed. The termination for these ports should only be used if this device is located at either end of the multidrop/ daisy-chained RS-485 network.

CAN Communications

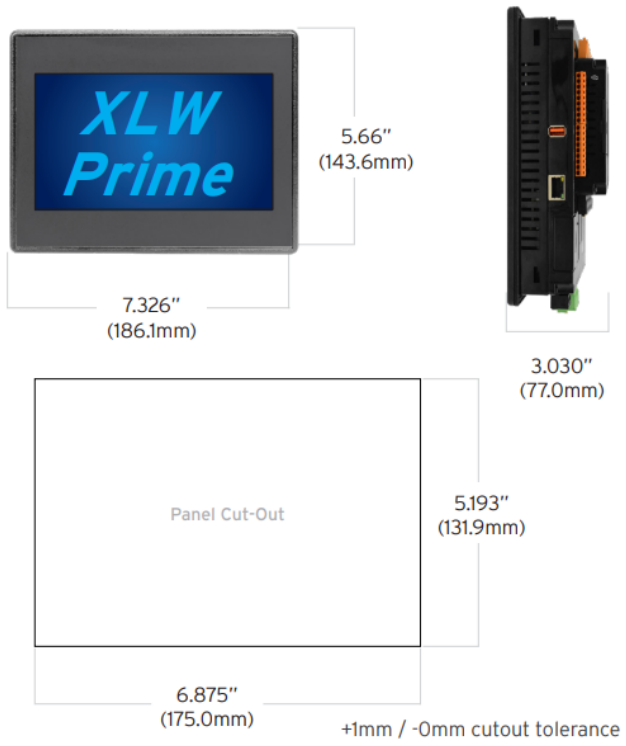


CAN Pin Assignments		
PIN	**SIGNAL**	**DESCRIPTION**
1	V-	CAN Ground – Black
2	CN_L	CAN Data Low – Blue
3	SHLD	Shield Ground – None
4	CN_H	CAN Data High – White
5	V+ (NC)	No Connect – Red

- **Solid/Stranded Wire**: 12-24 awg (2.5-0.2mm).
- **Strip Length**: 0.28” (7mm).
- Locking spring-clamp, two-terminators per conductor.
- **Torque, Terminal Hold-Down Screws**: 4.5 – 7 in-lbs (0.50 – 0.78 N-m).
- V+ pin is not internally connected, the SHLD pin is connected to Earth ground via a 1MΩ resistor and 10 nF capacitor.

DIMENSIONS & INSTALLATION

Dimensions & Panel Cutout



Installation Information

- The XLW Prime utilizes a clip installation method to ensure a robust and watertight seal to the enclosure. Please follow the steps below for the proper installation and operation of the unit.
- This equipment is suitable for Class I, Division 2, Groups A, B, C and D or non-hazardous locations only.
- Digital outputs shall be supplied from the same source as the operator control station.
- Jumpers on connector JP1 shall not be removed or replaced while the circuit is live unless the area is known to be free of ignitable concentrations of flammable gases or vapors.

Installation Procedure

1. Carefully locate an appropriate place to mount the XLW Prime. Be sure to leave enough room at the top of the unit for insertion and removal of the microSD™ card.
2. Carefully cut the host panel per the diagram, creating a 131.9mm x 175.0mm, with a +1mm/-0mm panel cutout tolerance, opening into which the XLW Prime may be installed. If the opening is too large, water may leak into the enclosure, potentially damaging the unit. If the opening is too small, the OCS may not fit through the hole without damage.
3. Remove any burrs and or sharp edges and ensure the panel is not warped in the cutting process.
4. 4Remove all Removable Terminals from the XLW Prime. Insert the XLW Prime through the panel cutout (from the front). The gasket must be between the host panel and the XLW Prime.
5. Install and tighten the four mounting clips (provided in the box) until the gasket forms a tight seal. **NOTE**: Max torque is 0.8 to 1.13Nm, or 7 to 10 in-lbs.
6. Reinstall the XLW Prime I/O Removable Terminal Blocks. Connect communications cables to the serial port, USB ports, Ethernet port, and CAN port as required.

SAFETY & MAINTENANCE

Warnings

1. To avoid the risk of electric shock or burns, always connect the safety (or earth) ground before making any other connections.
2. To reduce the risk of fire, electrical shock, or physical injury, it is strongly recommended to fuse the voltage measurement inputs. Be sure to locate fuses as close to the source as possible.
3. Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards.
4. In the event of repeated failure, do NOT replace the fuse again as repeated failure indicates a defective condition that will NOT clear by replacing the fuse.
5. Only qualified electrical personnel familiar with the construction and operation of this equipment and the hazards involved should install, adjust, operate, or service this equipment.
6. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury or loss of life.
7. **WARNING** - Battery may explode if mistreated. Do not recharge, disassemble, or dispose of in fire.
8. **WARNING - EXPLOSION HAZARD** - Batteries must only be changed in an area known to be non-hazardous.
9. **WARNING** - Do not disconnect while circuit is live unless are is know to be non-hazardous.

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following
two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Precautions

All applicable codes and standards need to be followed in the installation of this product. Adhere to the following safety precautions whenever any type of connection is made to the module:

1. Connect the safety (earth) ground on the power connector first before making any
2. other connections.
3. When connecting to the electric circuits or pulse-initiating equipment, open their
4. related breakers.
5. Do NOT make connection to live power lines.
6. Make connections to the module first; then connect to the circuit to be monitored.
7. Route power wires in a safe manner in accordance with good practice and local codes.
8. Wear proper personal protective equipment including safety glasses and insulated gloves when making connections to power circuits.
9. Ensure hands, shoes, and floor are dry before making any connection to a power line.
10. Make sure the unit is turned OFF before making connection to terminals.
11. Make sure all circuits are de-energized before making connections.
12. Before each use, inspect all cables for breaks or cracks in the insulation. Replace
13. immediately if defective.
14. Use copper conductors in Field Wiring only, 60/75˚C.
15. Use caution when connecting controllers to PCs via serial or USB. PCs, especially laptops,may use “floating power supplies” that are ungrounded. This could cause a damaging voltage potential between the laptop and controller. Ensure the controller and laptop are grounded for maximum protection. Consider using a USB isolator due to voltage potential differences as a preventative measure.
