

XLE MODEL

XLE & XLT OCS DATASHEET

MODEL 3:

Rev T or Later [Europe: XLEe - Rev R or later, XLTe - Rev K or Later] 12 DC In, 12 DC Out, 2 - 12-bit Analog In

XLT MODEL

TECHNICAL SPECIFICATIONS

1.1 General		
Primary Pwr. Range	10-30VDC	
Required Power (Steady State)	130mA @ 24VDC	
-22 Heater Option	250mA @ 24VDC with Heater Operating *Heater Option - Mod- el# plus "-22"	
Typical power-back- light 100%	164mA @ 10 (1.64W) 116mA @ 24V (2.77W)	
Power Backlight Off	15mA @ 24V (0.36W)	
Power Ethernet Models	35mA @ 10V (0.35W) 20mA @ 24V (0.48W)	
Inrush Current	30A for < 1ms	
Real Time Clock	Battery backed; lithium coin cell CR2450	
Clock Accuracy	+/- 90 Secs/Month at 25°C.	
Relative Humidity	5 to 95% Non-condensing	
Operating Temp.	-10°C to +60°C	
-22 Heater Option	-40°C to +50°C	
Storage Temp.	-20°C to +60°C	
Weight	0.75 lbs/340 g (without I/O)	
Altitude	Up to 2000m	
Rated Pollution Degree	Evaluated for Pollution Degree 2 rating	
Certifications (UL/CE)	North America Europe	

1.2 User Interface		
Display Type	Transflective LCD Sunlight Readable	
Resolution	128 x 64 pixels (XLE) 160 x 128 pixels (XLT)	
Color	Monochrome	
Built-In Storage	16MB	
User-Program. Screens	1023 max pages; 50 objects per page	
Backlight	LED	
Backlight Lifetime	30,000+ hrs	
Brightness Control	0-100% (XLT) On/Off (XLE) via System Register %SR57	
Number of Keys	20 (XLEe) 5 (XLTe)	
Touchscreen (XLTe)	Resistive 1,000,000+ touch life	

1.3 Connectivity		
Serial Ports	RS-232 full handshaking or RS-485 half duplex on first Modular Jack (MJ1) RS-232 or RS-485 on second Modular Jack (MJ2)	
USB Mini-B	Programming only	
CAN	1 x CAN Port, Isolated 1kV	
CAN Protocols	CsCAN, CANopen, DeviceNet, J1939	
Ethernet	Ethernet versions only	
Ethernet Protocols	TCP/IP, Modbus TCP, FTP, SRTP, EGD, ICMP, ASCII	
Remote I/O	SmartRail, SmartStix, SmartBlock, SmartMod	
Removable Memory	microSD, SDHC, SDXC IN FAT32 format, support for 32 GB max. Application Updates, Datalogging, and more	
Audio (XLTe only)	Beeper, System or Software Controlled	

1.4 Control & Logic		
Control Lang. Support	Advanced Ladder Logic Full IEC 61131-3 Languages	
Logic Program Size	256kB	
Logic Scan Rate	0.7ms/kB (XLE) 0.8ms/kB (XLT)	
Digital Inputs	2048	
Digital Outputs	2048	
Analog Inputs	512	
Analog Outputs	512	
Gen. Purpose	9,999 (words) Retentive	

2,048 (bits) Retentive

2,048 (bits) Non-retentive

XLEe and XLTe = Ethernet Versions

1.5 High-Speed Inputs		
Number of Counters	4	
Maximum Frequency	500kHz each	
Accumulator Size	32-bits each	
Modes Supported	Totalizer, quadrature, pulse measurement, frequency measurement, set-point controlled outputs	

1.6 High-Speed Outputs		
Modes Supported	Stepper, PWM	
Output Frequency	10kHz or 65kHz with HE-XHSQ	

XLE/XLT User Manual [MAN0878]

The User Manual includes extensive information on:

Built-In I-O

Registers

- Common %S & %SR Registers
- HSC/PWM/Totalizer/Quadrature & Accumulator Registers
- Resource Limits

1.7 Digital DC Inputs			
Innuits her Module		g 4 Configu- SC Inputs	
Commons per Module	per 1		
Input Voltage Range	12VDC	/ 24VDC	
Absolute Max. Voltage	30VDC Max		
Input Impedance	10kΩ		
Input Current:	Positive Logic:	Negative Logic:	
Upper Threshold Lower Threshold	0.8mA 0.3mA	-1.6mA -2.1mA	
Max. Upper Threshold 8VDC		/DC	
Min. Lower Threshold	3VDC		
OFF to ON Response	1ms		
ON to OFF Response	1ms		
High Speed Counter Max Freq*	ter 500kHz Max		

^{*}See I/O info below for detail regarding HSC and PWM

1.8 Digital DC Outputs			
Outputs per Module	12 Including 2 Config- urable PWM Outputs		
Commons per Module	1		
Output Type	Sourcing / 10kΩ Pull- Down		
Absolute Max. Voltage	28VDC Max.		
Output Protection	Short Circuit		
Max. Output Current/Point	0.5A		
Max. Total Current	4A Continuous		
Output Frequency	10kHz or 65kHz with HE-XHSQ		
Max. Output Supply Voltage	30VDC		
Min. Output Supply Voltage	10VDC		
Max. Voltage Drop at Rated Current	0.25VDC		
Max. Inrush Current	650mA per Channel		
Min. Load	None		
OFF to ON Response	1ms		
ON to OFF Response	1ms		
Output Characteristics	Current Sourcing (Pos. Logic)		
PWM Out	≈ 5kHz		
Rise Time	50 - 115µs		
Fall Time	8-20µs		

1.9 Analog Inputs			
Number of Chan- nels	2		
Input Ranges	0 - 10VDC 0 - 20mA 4 - 20mA		
Safe Input Range	-0.5V to +12V		
Input Impedance (Clamped @ -0.5 Vdc to 12 Vdc)	Current Mode: 100Ω Voltage Mode: $500k\Omega$		
Nominal Resolution	12 Bits		
%AI full scale	OV, 20mA, 100mV: 32,000 counts full scale		
Max. Over-Current	35mA		
Conversion Speed	All channels converted once per ladder scan		
Max. Error @25°C (excluding zero) Adjusting filter may improve error.	4-20mA 1.00% 0-20mA 1.00% 0-10VDC 0.50%		
Filtering	160Hz hash (noise) filter 1-128 scan digital running average filter		

2 CONTROLLER OVERVIEW

2.1 - Overview of XLE and XLT

- Function Keys Softkeys
- Navigation Keys
- Touchscreen Wide Range DC Power CAN Port

- CAN POIL
 Mounting Clip Locations
 RS232/RS485 Serial Ports (2)
 USB Mini-B Port
 Ethernet LAN Port (optional)
 Optional Built-In I/O

- 12. High Capacity microSD Slot
- 13. Configuration Switches
- 14. DIN Rail Clip

Wiring Details:

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm²).

Strip Length: 0.28" (7mm).

Torque, Terminal Hold-Down Screws: 4.5 - 7 in-lbs (0.50 - 0.78 N-m).

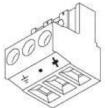

NOTE: See Precaution #12 on page 6 about USB and grounding.

controller overview continued on next page...

controller overview continued...

2.2 - Power Wiring

Primary Power Port Pins		
PIN	SIGNAL	DESCRIPTION
1	Ground	Frame Ground
2	DC-	Input Power Supply Ground
3	DC+	Input Power Supply Voltage

DC Input / Frame

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm).

Strip length: 0.28" (7mm).

Torque, Terminal Hold-Down Screws: 4.5 - 7 in-lbs (0.50 - 0.78 N-m).

DC- is internally connected to I/O V-, but is isolated from CAN V-. A Class 2 power supply must be used.

POWER UP

1. OPTION: Attach ferrite core with a minimum of two turns of the DC+ and DC- signals from the DC supply that is powering the controllers.

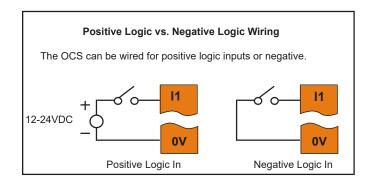

3. Apply recommended power.

wiring: I-O continued...

3.2 - Digital Inputs

Digital inputs may be wired in either a Positive Logic or Negative Logic fashion as shown. The setting in the Cscape Hardware Configuration for the Digital Inputs must match the wiring used in order for the correct input states to be registered. P1 jumper settings are required for Pos/Neg setup. When used as a normal input and not for high speed functions, the state of the input is reflected in registers %11 - %112.P

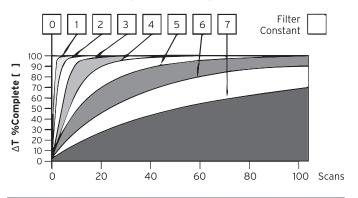

Digital inputs may alternately be specified for use with High Speed Counter functions, also found in the Hardware Configuration for Digital Inputs. Refer to the XLE/XLT User Manual (MANO878) for full details.

3 Wiring: Inputs and Outputs

3.1 - Analog Input Filtering

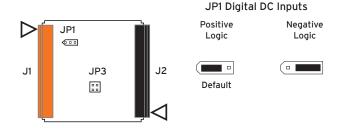

Raw input values for channels 1-4 are found in the registers as Integer-type data with a range from 0 - 32000.

Analog inputs may be filtered digitally with the Filter Constant found in the Cscape Hardware Configuration for Analog Inputs. Valid filter values are 0 - 7 and act according to the following chart.

Data Values	
INPUT MODE:	DATA FORMAT, 12-bit INT:
0-20mA, 4-20mA	0-32000
0-10V	0-32000

3.3 - Jumper Setting Locations for Model 3

JP3 Analog In

Location of I/O jumpers Current V

(JP1 & JP3) and (20mA)

wiring connectors
(J1, J2, J3 & J4) with back cover removed.

A1 1 2 4 A2

NOTE: The Cscape Module Configuration must match the selected I/O (JP) jumper settings. (Cscape Path: Controller -> Hardware Configuration -> Local I/O -> Config -> Module Setup -> Analog In)

NOTE: When using JP3 (A1-A2), each channel can be independently configured.

Back Panel Torque Rating for XLE/XLT: 3.0 - 4.0 in-lbs (0.34 - 0.45 N-m)

wiring: I-O continued on next page...

Voltage

(10V)

A2 3 0 0 4

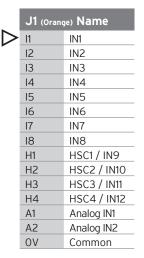

1 0 0 2

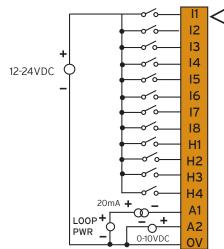

wiring: inputs & outputs continued...

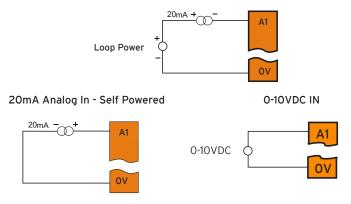

3.4 - Wiring Connectors

J1 (Orange) Digital In/ Analog In

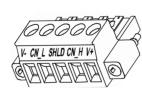

20mA Analog In - Not Self Powered

4 COMMUNICATIONS

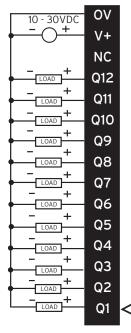

4.1 - CAN Communications

CAN	l Pin Ass	ignments
PIN	SIGNAL	DESCRIPTION
1	V-	CAN Ground - Black
2	CN L	CAN Data Low - Blue
3	SHLD	Shield Ground - None
4	CN H	CAN Data High - White
5	V+ (NC)	No Connect - Red

J2 (Black) Digital Out

J2 (Black) Name		
OV	Common	
V+	V+	
NC	No Connect	
Q12	OUT 12	
Q11	OUT 11	
Q10	OUT 10	
Q9	OUT 9	
Q8	OUT 8	
Q7	OUT 7	
Q6	OUT 6	
Q5	OUT 5	
Q4	OUT 4	
Q3	OUT 3	
Q2	OUT2/PWM2	
Q1	OUT1/PWM1	

CAN

Solid/Stranded Wire: 12-24 awg (2.5-0.2mm)

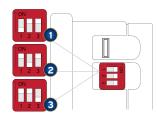

Strip Length: 0.28" (7mm)

Locking spring-clamp, two-terminators per conductor

Torque, Terminal Hold-Down Screws: 4.5 - 7 in-lbs (0.50 - 0.78 N-m)

V+ pin is not internally connected, the SHLD pin is connected to Earth ground via a $1M\Omega$ resistor and 10 nF capacitor.

4.2 - Dip Switches

The DIP switches are used to provide a built-in termination to both the MJ1 port and MJ2 port if needed. The termination for these ports should only be used if this device is located at either end of the multidrop/daisy-chained RS-485 network.

DIP SWITCHES

PIN	NAME	FUNCTION	DEFAULT
1	MJ1 RS-485 Termination	ON = Terminated	OFF
2	MJ2 RS-485 Termination	ON =Terminated	OFF
3	Bootload	Always Off	OFF

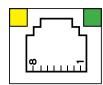

page 4 of 6

communications continued on next page...

communications continued...

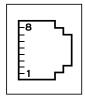

4.3 - Ethernet Communications

Green LED indicates link - when illuminated, data communication is available.

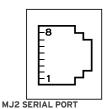

Yellow LED indicates activity - when flashing, data is in transmission.

4.4 - Serial Communications

MJ1: RS-232 w/full handshaking or RS-485 half-duplex

RS-485 termination via switches; biasing via software

MJ2: RS-232 or RS-485 half or full-duplex, software selectable

RS-485 termination via switches; biasing via software

MJ1	MJ1 PINS		
PIN	SIGNAL	DIRECTION	
8	TXD	OUT	
7	RXD	IN	
6	OV	GROUND	
5	+5V @ 60mA	OUT	
4	RTS	OUT	
3	CTS	IN	
2	RX-/TX-	IN/OUT	
1	RX+/TX+	IN/OUT	

MJ2 PINS				
PIN	SIGNAL	DIRECTION		
8	232 TXD	OUT		
7	232 RXD	IN		
6	OV	Ground		
5	+5V @ 60mA	OUT		
4	485 TX-	OUT		
3	485 TX+	OUT		
2	485 RX- or RX/TX-	IN or IN/OUT		
1	485 RX+ or RX/TX+	IN or IN/OUT		

Attach optional ferrite core with a minimum of two turns of serial cable. See website for more details. [Part #: HE-FBD001]

5 BUILT-IN I/O for Model 3

The I/O is mapped into OCS Register space, in three separate areas: Digital/Analog I/O, High-Speed Counter I/O, and High-speed Output I/O. Digital/Analog I/O location is fixed starting at 1, but the high-speed counter and high-speed output references may be mapped to any open register location. For more details, see the XLE/XLT OCS User's Manual (MAN0878).

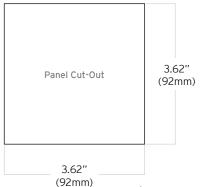

Digital and Analog I/O Functions				
Digital Inputs	%I1-12			
Reserved	%l13-31			
ESCP Alarm	%I32			
Digital Outputs	%Q1-12

DIMENSIONS & INSTALLATION

6.1 - Dimensions

+/- 1mm cutout tolerance

6.2 - Installation Procedure

- The XLE/XLT utilizes a clip installation method to ensure a robust and watertight seal to the enclosure. Please follow the steps below for the proper installation and operation of the unit.
- This equipment is suitable for Class I. Division 2. Groups A. B. C and D or non-hazardous locations only.
- Digital outputs shall be supplied from the same source as the operator control station.
- Jumpers on connector JP1 shall not be removed or replaced while the circuit is live unless the area is known to be free of ignitable concentrations of flammable gases or vapors.
- Carefully locate an appropriate place to mount the XLE/XLT. 1. Be sure to leave enough room at the top of the unit for insertion and removal of the microSD card.
- 2. Carefully cut the host panel per the diagram, creating a 92mm x 92mm +/-0.1mm opening into which the XLEe/XLTe may be installed. If the opening is too large, water may leak into the enclosure, potentially damaging the unit. If the opening is too small, the OCS may not fit through the hole without damage.
- 3. Remove any burrs and or sharp edges and ensure the panel is not warped in the cutting process.
- Remove all Removable Terminals from the XLE/XLT. Insert the XLE/XLT through the panel cutout (from the front). The gasket must be between the host panel and the XLE/XLT
- 5. Install and tighten the four mounting clips (provided in the box) until the gasket forms a tight seal. (NOTE: Max torque 0.8 to 1.13 N m,
- Reinstall the XLE/XLT I/O Removable Terminal Blocks. Connect communications cables to the serial port, USB ports, Ethernet port, and CAN port as required.

page 5 of 6

7 SAFETY

7.1 - WARNINGS

- To avoid the risk of electric shock or burns, always connect the safety (or earth) ground
- before making any other connections.

 To reduce the risk of fire, electrical shock, or physical injury, it is strongly recommended to fuse the voltage measurement inputs. Be sure to locate fuses as close to the source as possible.
- Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards.
- In the event of repeated failure, do NOT replace the fuse again as repeated failure indicates a defective condition that will NOT clear by replacing the fuse.
- Only qualified electrical personnel familiar with the construction and operation of this equipment and the hazards involved should install, adjust, operate, or service this equipment. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury
- WARNING Battery may explode if mistreated. Do not recharge, disassemble, or dispose
- WARNING EXPLOSION HAZARD Batteries must only be changed in an area known to

7.2 - FCC COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation

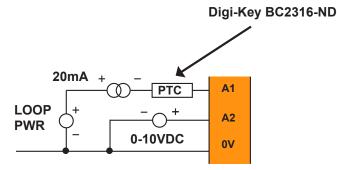

7.3 - PRECAUTIONS

All applicable codes and standards need to be followed in the installation of this product. Adhere to the following safety precautions whenever any type of connection is made to the module:

- Connect the safety (earth) ground on the power connector first before making any other connections
- 2. When connecting to the electric circuits or pulse-initiating equipment, open their related breakers
- Do NOT make connection to live power lines.
- Make connections to the module first; then connect to the circuit to be monitored.
- 5. Route power wires in a safe manner in accordance with good practice and local codes.
- 6. Wear proper personal protective equipment including safety glasses and insulated gloves when making connections to power circuits.
- Ensure hands, shoes, and floor are dry before making any connection to a power 7.
- 8. Make sure the unit is turned OFF before making connection to terminals.
- Make sure all circuits are de-energized before making connections
- 10. Before each use, inspect all cables for breaks or cracks in the insulation. Replace immediately if defective.
- Use copper conductors in Field Wiring only, 60/75°C.
 Use caution when connecting controllers to PCs via serial or USB. PCs, especially laptops, may use "floating power supplies" that are ungrounded. This could cause a damaging voltage potential between the laptop and controller. Ensure the controller and laptop are grounded for maximum protection. Consider using a USB isolator due to voltage potential differences as a preventative measure.

8 ANALOG IN TRANZORB FAILURE

A common cause of Analog Input Tranzorb Failure on Analog Inputs Models 2, 3, 4 & 5: If a 4-20mA circuit is initially wired with loop power, but without a load, the analog input could see 24VDC. This is higher than the rating of the tranzorb. This can be solved by NOT connecting loop power prior to load connection, or by installing a low-cost PTC in series between the load and analog input.

BATTERY MAINTENANCE

The XLE/XLT uses a replaceable non-rechargeable 3V Lithium coin cell battery (CR2450) to run the Real-Time Clock and to keep the retained register values. This battery is designed to maintain the clock and memory for 7 to 10 years. Please reference MANO878 providing instructions on how to replace the battery.

10 ACCESSORIES

10.1 Backup Battery: HE-BAT009

The XLE and XLT use a lithium battery [CR2450] to run the Real-Time Clock and to maintain the retained register values. This battery is designed to maintain the clock and memory for 7-10 years.

Programming Cables Kit: HE-XCK

This programming cable kit includes the following adapter cables:

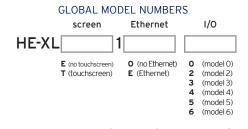

- USB to MiniUSB
- USB to RS-232 Serial
- · RS-232 Serial to RJ45 Ethernet

10.3 2/4 Channel Analog Output Kit

- HE-XDACOO7 2 Channel Analog Output I/O Kit
- HE-XDAC107 4 Channel Analog Output I/O Kit

Visit the Horner Website to purchase accessories.
