XL15+ OCS DATASHEET

MODEL 3
12 DC In, 12 DC Out, 2 – 12-bit Analog In

1 TECHNICAL SPECIFICATIONS

1.1 General

Required Power (Steady State)	1978mA @ 10V (19.78W) 852mA @ 24V (8.52W)
Typical Power Backlight 100%	800mA @ 24VDC
Power Backlight 50%	385mA (9.6W)
Power Backlight Off	290mA (7W)
Inrush Current	25A for < 1ms @ 24VDC DC
Primary Pwr. Range	18–30VDC
Clock Accuracy	+/- 20 ppm max. at 25ºC (+/- 1 Minutes per Month)
Real Time Clock	With Battery (5-10 Yrs life, Replaceable)
Relative Humidity	5 to 95% Non-condensing
Operating Temp.	-10°C to +60°C
Storage Temp.	-30°C to +70°C
Weight	7.63 lbs/3.46 kg (without I/O)
Certifications (UL/CE)	North America Europe

1.2 Display

Display Type	15" XGA TFT (500 cd/m^2 typical)
Resolution	1024x768
Color	24-bit (16,777,216)
Built-In Storage	4 GB
User-Program. Screens	1023 max pages; 1023 objects per page
Backlight	LED – 50,000 hour life
Brightness Control	0-100% via System Register
Touchscreen	Resistive w/laminated cover, 1,000,000+ touch life

1.3 Connectivity

3x Serial Ports	RS-232 full handshaking or RS-485 half duplex on first Modular Jack (MJ1) RS-232 or RS-485 on second Modular Jack (MJ2) RS-232 or RS-485 on third Modular Jack (MJ3) (Software Controlled RS-485 Termination/Biasing)
USB mini-B	USB 2.0 (480 Mbps) Programming & Data Access
3x USB A (500mA max)	USB 2.0 (480 Mbps) for USB FLASH Drives (2TB)
2x CAN	125 kbps – 1 Mbps, Remote I/O, Peer-to-Peer Comms, Cscape (Isolated Ports)
2 x Ethernet	1 Gigabit (Auto-MDX), Modbus TCP C/S, HTTP, FTP, SMTP, Cscape, Ethernet IP
Remote I/O	SmartRail, SmartStix, SmartBlock, SmartMod
Removable Memory	MicroSD, SDHC, SDXC IN FAT32 format, support for 128GB max. Application Updates, Datalogging, more
Audio	Beeper, Mic In, Line Out

XL15+ User Manual [MAN1106]

The User Manual includes extensive information on:
- Built-in I/O
- I/O Status and Calibration
- Common %S & %SR Registers
- HSC/PWM/Totalizer/Quadrature & Accumulator Registers
- Resource Limits

1.4 Control & Logic

Control Lang. Support	Advanced Ladder Logic Full IEC 1131-3 Languages
Logic Program Size	2 MB
Logic Scan Rate	.006ms/kB
Online Programming Changes	Supported in Advanced Ladder
Digital Inputs	2048
Digital Outputs	2048
Analog Inputs	512
Analog Outputs	512
Gen. Purpose Registers	49,999 (words) Retentive 16,384 (bits) Retentive 16,384 (bits) Non-retentive

1.5 High-Speed Inputs

Number of Counters	4
Maximum Frequency	1MHz Max
Accumulator Size	32-bits each
Modes Supported	Totalizer, quadrature, pulse measurement, frequency measurement, set-point controlled outputs

1.6 High-Speed Outputs

Modes Supported	Stepper, PWM
Output Frequency	500kHz

MADE IN USA   CE

2/8/2022 | MAN1126-06-EN

1.7 Digital DC Inputs

Inputs per Module	12 Including 4 Configu-rable HSC Inputs		
Commons per Module	1		
Input Voltage Range	12VDC / 24VDC		
Absolute Max. Voltage	30VDC Max.		
Input Impedance	10kΩ		
Input Current:		**Positive Logic:**	**Negative Logic:**
Upper Threshold		0.8mA	-1.6mA
Lower Threshold		0.3mA	-2.1mA
Max. Upper Threshold	8VDC		
Min. Lower Threshold	3VDC		
OFF to ON Response	1ms		
ON to OFF Response	1ms		
High Speed Counter Max Freq*	1MHz Max		

*See I/O info below for detail regarding HSC and PWM

1.8 Digital DC Outputs

Outputs per Module	12 Including 2 Config-urable PWM Outputs
Commons per Module	1
Output Type	Sourcing / 10kΩ Pull-Down
Absolute Max. Voltage	28VDC Max.
Output Protection	Short Circuit
Max. Output Current/Point	0.5A
Max. Total Current	4A Continuous
Max. Output Supply Voltage	30VDC
Min. Output Supply Voltage	10VDC
Max. Voltage Drop at Rated Current	0.25VDC
Max. Inrush Current	650mA per Channel
Min. Load	None
OFF to ON Response	1ms
ON to OFF Response	1ms
Output Characteristics	Current Sourcing (Pos. Logic)
PWM Out	≈5kHz
Rise Time	50 - 115µs
Fall Time	8 - 20µs

1.9 Analog Inputs

|	
Number of Channels	2
Input Ranges	0 - 10VDC 0 – 20mA 4 - 20mA
Safe Input Range	-0.5V to +12V
Input Impedance (Clamped @ -0.5VDC to 12VDC)	Current Mode: 100Ω Voltage Mode: 500kΩ
Nominal Resolution	12 Bits
%AI full scale	0V, 20mA, 100mV: 32,000 counts full scale
Max. Over-Current	35mA
Conversion Speed	Once per program logic scan
Max. Error @25°C (excluding zero) Adjusting filtering may improve error.	4-20mA 1.00% 0-20mA 1.00% 0-10VDC 0.50%
Filtering	160 Hz hash (noise) filter 1-128 scan digital running average filter

2 CONTROLLER OVERVIEW
2.1 - Port Connectors
1. Virtual Function Keys Slide in from the Right Upon Touching Top Right Corner of Screen
2. Optional Built-In I/O
3. High Capacity microSD Slot
4. USB Mini-B Port
5. Dual CAN Port
6. USB A Ports (3)
7. Mic Input / Audio Output
8. Dual Ethernet LAN Port
9. Mini Display Port Video Output (Future)
10. Wide-Range DC Power
11. Dual CAN Port
12. RS232/RS485 Serial Ports (3)

NOTE: See Precaution #12 on page 6 about USB and grounding.

59 South State Ave., Indianapolis, IN 46201 | (p) 317.916.4274 (tf) 877.665.5666 (f) 317.639.4279 | www.hornerautomation.com

2/8/2022 | MAN1126-06-EN

controller overview continued...

2.2 - Power Wiring

Primary Power Port Pins		
PIN	SIGNAL	DESCRIPTION
1	Ground	Frame Ground
2	DC-	Input Power Supply Ground
3	DC+	Input Power Supply Voltage

DC Input / Frame
Solid/Stranded Wire: 12-24 awg (2.5-0.2mm).
Strip length: 0.28" (7mm).
Torque, Terminal Hold-Down Screws: 4.5 – 7 in-lbs (0.50 – 0.78 N-m).

DC- is internally connected to I/O V-, but is isolated from CAN V-.
A Class 2 power supply must be used.

POWER UP
1. OPTION: Attach ferrite core with a minimum of two turns of the DC+ and DC- signals from the DC supply that is powering the controllers.
2. Connect to earth ground.
3. Apply recommended power.

3 WIRING: INPUTS & OUTPUTS

3.1 - Digital Input

Positive Logic vs. Negative Logic Wiring

The OCS can be wired for positive logic inputs or negative.

Positive Logic In   Negative Logic In

DIGITAL INPUTS
Digital inputs may be wired in either a Positive Logic or Negative Logic fashion as shown. The setting in the Cscape Hardware Configuration for the Digital Inputs must match the wiring used in order for the correct input states to be registered. No jumper settings are required for XL+. When used as a normal input and not for high speed functions, the state of the input is reflected in registers %I1 – %I12.

Digital inputs may alternately be specified for use with High Speed Counter functions, also found in the Hardware Configuration for Digital Inputs. Refer to the XL+ User Manual (MAN1106) for full details.

DIGITAL OUTPUTS
Digital outputs are Positive Logic. If an output is turned on, the voltage supplied at the Vext terminal is applied to that output. When used as normal outputs, the state of the output may be controlled using the registers %Q1 - %Q12.

The first two digital outputs may alternately be specified for use as Pulse Width Modulation (PWM) or Stepper outputs. The configuration for these functions is found in the Cscape Hardware Configuration for Digital Outputs. Refer to the XL+ User Manual (MAN1106) for full details.
wiring continued...

3.2 - Analog Input

ANALOG INPUTS
Raw input values for channels 1-4 are found in the registers as Integer-type data with a range from 0 – 32000.
Analog inputs may be filtered digitally with the Filter Constant found in the Cscape Hardware Configuration for Analog Inputs. Valid filter values are 0 – 7 and act according to the following chart.

Data Values	
INPUT MODE:	DATA FORMAT, 12-bit INT:
0-20mA, 4-20mA	0-32000
0-10V	0-32000

3.3 - Jumper Setting Details

JP1 Digital DC Inputs

Positive Logic   Negative Logic

Default

JP3 Analog In

Location of I/O jumpers (JP1 & JP3) and wiring connectors (J1, J2, J3 & J4) with back cover removed.

Current (20mA)   Voltage (10V)

NOTE: The Cscape Module Configuration must match the selected I/O (JP) jumper settings.
Cscape Path: **Controller > Hardware Configuration > Local I/O > Config > Module Setup > Analog In**

NOTE: When using JP3 (A1-A2), each channel can be independently configured.

**Back Panel Torque Rating for XL15+:** 3.0 - 3.5 in-lbs (0.34 - 0.40 N-m)

wiring: inputs & outputs continued...

3.4 - Connector Wiring

J1 (Orange) Digital In/ Analog In
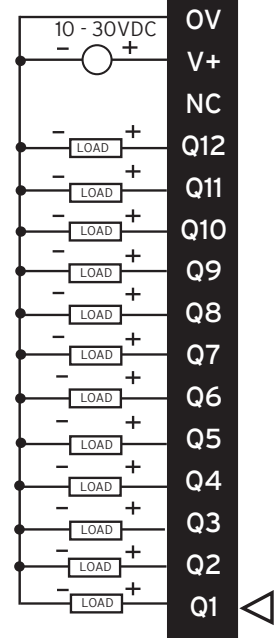

J1 (Orange)	Name
I1	IN1
I2	IN2
I3	IN3
I4	IN4
I5	IN5
I6	IN6
I7	IN7
I8	IN8
H1	HSC1 / IN9
H2	HSC2 / IN10
H3	HSC3 / IN11
H4	HSC4 / IN12
A1	Analog IN1
A2	Analog IN2
0V	Common

J2 (Black) Digital Out

| J2 (Black)	Name
0V	Common
V+	V+
NC	No Connect
Q12	OUT 12
Q11	OUT 11
Q10	OUT 10
Q9	OUT 9
Q8	OUT 8
Q7	OUT 7
Q6	OUT 6
Q5	OUT 5
Q4	OUT 4
Q3	OUT 3
Q2	OUT 2 / PWM 2
Q1	OUT 1 / PWM 1

20mA Analog In - Not Self Powered
20mA Analog In - Self Powered
0-10VDC IN

Wiring Details:
Solid/Stranded Wire: 12-24 awg (2.5-0.2mm^2).
Strip Length: 0.28" (7mm).
Torque, Terminal Hold-Down Screws: 4.5 – 7 in-lbs (0.50 – 0.78 N-m).

2/8/2022 | MAN1126-06-EN

4 COMMUNICATIONS

4.1 - CAN Communications

CAN Pin Assignments		
PIN	**SIGNAL**	**DESCRIPTION**
1	V−	CAN Ground – Black
2	CN L	CAN Data Low – Blue
3	SHLD	Shield Ground – None
4	CN H	CAN Data High – White
5	V+ (NC)	No Connect – Red

**Solid/Stranded Wire:** 12-24 awg (2.5-0.2mm).
Strip Length: 0.28" (7mm).
Locking spring-clamp, two-terminators per conductor.
Torque, Terminal Hold-Down Screws: 4.5 – 7 in-lbs (0.50 – 0.78 N-m).
V+ pin is not internally connected, the SHLD pin is connected to Earth ground via a 1MΩ resistor and 10 nF capacitor.

4.2 - Serial Communications

MJ1: RS-232 w/full handshaking or RS-485 half-duplex via software switch

RS-485 termination and biasing via software

MJ1 PINS		
PIN	**SIGNAL**	**DIRECTION**
8	TXD	OUT
7	RXD	IN
6	0V	GROUND
5	+5V @ 60mA	OUT
4	RTS	OUT
3	CTS	IN
2	RX-/TX-	IN/OUT
1	RX+/TX+	IN/OUT

MJ2/3 SERIAL PORTS

**MJ2/3:** RS-232 or RS-485 half or full-duplex, software selectable

RS-485 termination and biasing, software selectable

MJ2/3 PINS		
PIN	**SIGNAL**	**DIRECTION**
8	TXD RS232	OUT
7	RXD RS232	IN
6	0V	Ground
5	+5V @ 60mA	OUT
4	TX- RS485	OUT
3	TX+ RS485	OUT
2	RX- RS485	IN
1	RX+ RS485	IN

Attach optional ferrite core with a minimum of two turns of serial cable. See website for more details. [Part #: HE-FBD001]

4.3 - Ethernet Communications
Green LED indicates link – when illuminated, data communication is available.

Orange LED indicates activity – when flashing, data is in transmission.
5 BUILT-IN I/O for Model 3

The I/O is mapped into OCS Register space, in three separate areas – Digital/Analog I/O, High-Speed Counter I/O, and High-speed Output I/O. Digital/Analog I/O location is fixed starting at 1, but the High-Speed Counter and High-Speed Output references may be mapped to any open register location. For more details refer to User Manual (MAN1106).

| Digital and Analog I/O Function	
Digital Inputs	%I1-12
Reserved	%I13-31
ESCP Alarm	%I32
Digital Outputs	%Q1-12
Reserved	%Q13-24
Analog Inputs	%AI1-2
Reserved	%AI3-12
Analog Outputs	n/a
Reserved	%AQ1-8

6 ANALOG INPUT TRANZORB FAILURE

A common cause of Analog Input Tranzorb Failure on Analog Inputs. If a 4-20mA circuit is initially wired with loop power, but without a load, the Analog input could see 24VDC. This is higher than the rating of the tranzorb. This can be solved by NOT connecting loop power prior to load connection, or by installing a low-cost PTC in series between the load and Analog input.

(370.00mm)

Panel Tolerance: +/-0.5mm

NOTE: For mounting template, please refer to MAN1124.

7.2 - Installation Procedure

The XL15+ is a panel mounted device and is meant to be an enclosure suitable for the equipment, such that the equipment is only accessible with the use of a tool. The XL15+ is suitable for use in Class I, Division II, Groups F and G, and Class III Hazardous Locations or non-hazardous locations only.

The XL15+ allows unique installation options that simplify installation for systems that may not need robust vibration or water resistance.

If the system does not experience shock or vibration and will not be exposed to weather or wash down conditions the unit can be installed by cutting the rectangular opening and installing the four supplied clips.

For systems that may experience shock or vibration or are installed outdoors or in wash down environments, the rectangular cut and clips are used and perimeter holes must be drilled in the panel. The supplied studs are then inserted into the perimeter of the controller and supplied nuts will secure the perimeter of the unit to the panel.

Please reference the XL15+ Quick Reference Guide (MAN1124) for Mounting Template.

1. Remove all connectors from the XL15+ OCS unit.
2. Carefully locate an appropriate place to mount the XL+. Be sure to leave enough room at the top of the unit for insertion and removal of the microSD card. Also leave enough room at the bottom for the insertion and removal of USB FLASH drives and wiring
3. Carefully cut the host panel per the diagram, with a tolerance of +/- 0.5mm. Remove any burrs/sharp edges and ensure the panel is not warped in the cutting process. - If the opening is too large, water may leak into the enclosure, potentially damaging the OCS. If the opening is too small, the OCS may not fit through the hole without damage.
4. Make sure both inner and outer gaskets are installed on the XL15+ OCS and are free from dust and debris. Check that the corners of the gasket are secure. Insert the OCS through the panel cutout (from the front). The gasket needs to be between the host panel and the OCS.
5. The two (2) spring clips will latch the unit in the panel.
6. Insert each of the four (4) mounting clips into the slots in the XL15+ OCS case. One clip should be installed on each corner. Lightly tighten each screw so the clip is held in place.
6. Tighten the screws on the clips such that the gasket is compressed against the panel. Recommended torque is 7-10 in-lbs (0.79-1.13 Nm). If the perimeter studs are needed, it is recommended to use a thread locker (similar to 242 Blue Loctite). Use supplied lock washers and nut. NOTE: Recommended torque is 3-4 in-lbs (0.34-0.45 Nm).
7. Reinstall the I/O Removable Terminal Blocks. Connect communications cables to the serial port, USB ports, Ethernet port, and CAN port as required.

2/8/2022 | MAN1126-06-EN

8 SAFETY

8.1 - WARNINGS

1. To avoid the risk of electric shock or burns, always connect the safety (or earth) ground before making any other connections.
2. To reduce the risk of fire, electrical shock, or physical injury, it is strongly recommended to fuse the voltage measurement inputs. Be sure to locate fuses as close to the source as possible.
3. Replace fuse with the same type and rating to provide protection against risk of fire and shock hazards.
4. In the event of repeated failure, do NOT replace the fuse again as repeated failure indicates a defective condition that will NOT clear by replacing the fuse.
5. Only qualified electrical personnel familiar with the construction and operation of this equipment and the hazards involved should install, adjust, operate, or service this equipment. Read and understand this manual and other applicable manuals in their entirety before proceeding. Failure to observe this precaution could result in severe bodily injury or loss of life.
6. **WARNING - EXPLOSION HAZARD** - Do not disconnect equipment while the circuit is live or unless the area is known to be free of ignitable concentrations.
7. **WARNING** - Do not replace the lithium battery while the device is energized. The device is intended for use with one lithium battery installed. This device shall not be operated with more than one lithium battery installed.

8.2 - FCC COMPLIANCE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation

8.3 - PRECAUTIONS

All applicable codes and standards need to be followed in the installation of this product. Adhere to the following safety precautions whenever any type of connection is made to the module:

1. Connect the safety (earth) ground on the power connector first before making any other connections.
2. When connecting to the electric circuits or pulse-initiating equipment, open their related breakers.
3. Do NOT make connection to live power lines.
4. Make connections to the module first; then connect to the circuit to be monitored.
5. Route power wires in a safe manner in accordance with good practice and local codes.
6. Wear proper personal protective equipment including safety glasses and insulated gloves when making connections to power circuits.
7. Ensure hands, shoes, and floor are dry before making any connection to a power line.
8. Make sure the unit is turned OFF before making connection to terminals.
9. Make sure all circuits are de-energized before making connections.
10. Before each use, inspect all cables for breaks or cracks in the insulation. Replace immediately if defective.
11. Use copper conductors in Field Wiring only, 60/75℃.
12. Use caution when connecting controllers to PCs via serial or USB. PCs, especially laptops, may use "floating power supplies" that are ungrounded. This could cause a damaging voltage potential between the laptop and controller. Ensure the controller and laptop are grounded for maximum protection. Consider using a USB isolator due to voltage potential differences as a preventative measure.

9 BACKUP BATTERY

The XL15+ uses a replaceable non-rechargeable 3V Lithium coin-cell battery to run the Real-Time Clock and to keep the retained register values. This battery is designed to maintain the clock and memory for 7-10 years. Please reference MAN1106 providing instructions on how to replace the battery.

10 ACCESSORIES

10.1   Backup Battery: HE-BAT013
The XL15+ uses a Renata CR2032 lithium battery to run the Real-Time Clock and to maintain the retained register values. This battery is designed to maintain the clock and memory for 7-10 years.

10.2   Programming Cables Kit: HE-XCK
This programming cable kit includes the following adapter cables:
- USB to MiniUSB
- USB to RS-232 Serial
- RS-232 Serial to RJ45 Ethernet

10.3   2/4 Channel Analog Output Kit
- HE-XDAC007 - 2 Channel Analog Output I/O Kit
- HE-XDAC107 - 4 Channel Analog Output I/O Kit

Visit the Horner Website to purchase accessories.
