Industrial Video & Control Co. and Elpro Technologies announce partnership

Industrial Video & Control and Elpro Technologies working cooperatively to provide wireless IP video solutions for industrial applications.

Newton, MA – February 17, 2009 – Industrial video specialist, Industrial Video and Control (IVC) and industrial wireless specialist, ELPRO Technologies, announced today their intention to collaborate in marketing industrially hardened wireless video systems.

The market demand for video systems in industrial plants and factories has exploded in recent years; however implementation of this technology has been limited by poor integration of a complete video system, and reliability concerns over the use of commercial specification equipment.

IVC offers a range of industrial video solutions that include enterprise-class camera management software and ruggedized IP camera hardware. For potentially hazardous areas, IVC has developed Class 1 Division 1 and Division 2 PTZ, fixed, and megapixel cameras. IVC's software provides powerful and flexible features for viewing and controlling cameras from multiple locations, as well as sophisticated storage and automatic alarm functions.

Elpro, one of the early leaders of industrial wireless products, have been looking for an industrial video partner for some years, to respond to growing market demand in this area. Elpro led the market in the 1990's by converting specialized industrial wireless systems into easy-to-use wireless products, and intend to do the same with video products in conjunction with IVC. "Elpro's high-power Class 1 Div 2 certified 802.11 radios and other hardened products provide a flexible video network infrastructure option for a key segment of our market," says Clarke Esler, IVC Marketing Manager. "We are very excited to be working with them."

IVC have developed their systems based on IP communications, and Elpro provides a range of highly reliable IP wireless products over several frequency bands. The market collaboration between IVC and Elpro will provide reliable and powerful wireless video systems, specifically developed for industrial applications. Ease of installation and powerful diagnostics are integral factors in the success of these new products.

About Industrial Video & Control Company

Based in Newton, MA, IVC delivers a broad range of quality IP based video systems to industrial, commercial and military applications. Their standards-based software, which delivers quality video to PCs and other client devices over a network, is designed to be scalable and easily integrate with third party software. A key strength of IVC is its ability to develop cameras, enclosures, and software to meet demanding customer requirements.

About Elpro Technologies

ELPRO Technologies is a world leader in industrial wireless solutions, covering a wide range of solutions from small wireless I/O applications to plant-wide wireless IP data and long distance out-of-plant wireless products. ELPRO is a global supplier with wireless products suitable and approved for all continents
