## Industrial Video & Control Co. expands its “Made in America” camera line

*Industrial Video & Control announces an expanded “Made in America” camera line to help integrators meet “Buy American” requirement of ARRA-funded projects*

**Newton, MA – September 1, 2009** – Industrial Video & Control Co. (IVC), a leading provider of networked-based video surveillance systems, announced today that it has expanded its product offering manufactured at its US facilities.

IVC is a manufacturer of IP-based cameras and developer of advanced software for managing networks of video systems. “We are seeing that many projects funded by stimulus money have a security component,” states Norman Fast, president of IVC. “We already manufacture most of our outdoor products at our facilities in Newton and Fall River, Massachusetts. To expand our American-made product offering, IVC is working with our international suppliers to take advantage of our manufacturing capacity and assemble additional cameras here. Most of our key competitors manufacture their hardware and software in Asia or Europe, so their products do not meet the requirements set forth in the ARRA.”

IVC’s headquarters and primary manufacturing facility is located in Newton, MA. The company’s software development team also designs and maintains IVC’s camera management and custom software products here. Hardware prototyping and product testing takes place at its Fall River location. “Despite the fact that we have been relatively busy during the current economic downturn, we still have the manufacturing capacity to final assemble products that, to this point, we have imported,” says Bill Richards, VP of Operations. “We feel we are now in a position to satisfy any video surveillance need with a camera that meets the “Buy American” requirement of the American Recovery and Reinvestment Act.”

IVC camera offering includes pan-tilt zoom, fixed, zoom-only and varifocal (manual zoom) cameras. IVC manufactures cameras that are suitable for the harshest weather and environmental conditions; their cameras have been certified for use in Class I Div 1 and Class I Div 2 (inherently dangerous) environments. IVC camera systems combine their camera products and state-of-the-art management software. Their Relay Server and View Station software packages enable remote viewing and control of video as well as management of all aspects of your surveillance systems. IVC software also facilitates integration of video into 3<sup>rd</sup> party applications.

### **About Industrial Video & Control Company**

Based in Newton, MA, IVC delivers a broad range of quality IP based video systems to industrial, commercial and military applications. Their standards-based software, which delivers quality video to PCs and other client devices over a network, is designed to be scalable and easily integrate with third party software. A key strength of IVC is its ability to develop cameras, enclosures, and software to meet demanding customer requirements.
