

For your automation solutions

# Collaborative Automation Partner Program

Source Code Change Management for all  
of your Schneider PLC & SCADA Programs

# MDT Software

Schneider Electric and MDT Software have joined together in a strategic partnership to formulate a single source for the ultimate in PLC program development software that includes dynamic change management software control over all the resulting device programs.

An Optimized Collaboration for a better management of your application changes.

## An efficient partnership for the control of your automation applications

**This partnership enables each company to continue to focus its efforts on its individual product line and strengths while making available to the marketplace the full spectrum of capabilities of the combined products.**

Products such as Schneider Electric's Unity Pro provide manufacturing automation engineers and developers with the vital tools:

- > IEC languages supported, multi-tasking, diagnostics, and graphical displays,
- > Folding this control system under the industry-leading MDT software AutoSave change management software's protective umbrella keeps these valuable assets secured, shielded, documented, and readily available for rapid disaster recovery, a must for today's manufacturing automation!

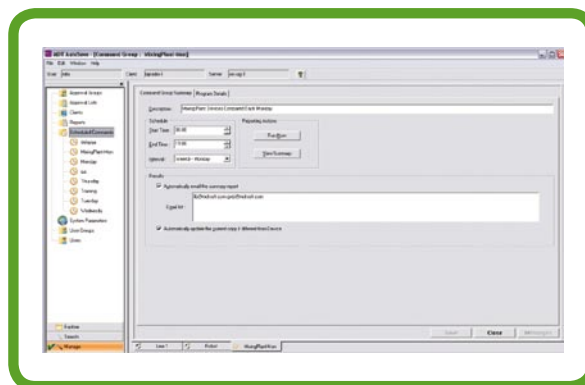

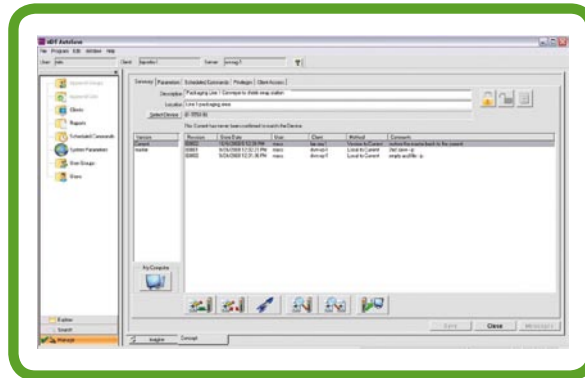

With change management support for the entire suite of Schneider Electric products (Unity, ProWORX32, Concept, ProWORXPLUS, PL7, ProWORX Nxt and Vijeo Citect), MDT Software's AutoSave rounds out the Schneider product-line capabilities. This synergistic coupling of impressive automation tools with the robust change management system positions Schneider Electric to become the dominant provider in that marketplace.

**MDT Software is the corporate standard for plant automation device management in many of the most advanced manufacturing facilities in the world.**

Since 1983, MDT's AutoSave has proven vital in the pharmaceutical, automotive, brewing/ beverage, airport, pulp, paper, metals & mining, oil & gas, utility industries around the world. With hundreds of installations around the world, AutoSave's seamless integration with Schneider's factory automation programming editors augments the value of both products. Supporting a wide range of automation device types, AutoSave provides these key features.

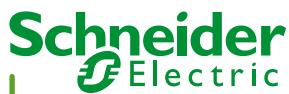

- > Capture program changes
- > Immediate, automatic archives and backups of program changes
- > Report changes
- > What, when, where, why, who
- > Real time notification to specified individuals
- > Monitor plant floor devices
- > Scheduled, unattended comparison of current archive to the processor; immediate detailed reporting of discovered undocumented differences with the capability to update the archive if different
- > Secure program files
- > User and computer must pass security checks before they can even access the files
- > Limit user capabilities
- > Restrict certain functions based upon plant policies
- > Detail the differences
- > On-demand review of detailed comparison report to pinpoint differences
- > Record all activities
- > Complete date/time-stamped records of all client/user activities
- > Facilitate rapid disaster recovery
- > Replace hardware, ghost the operating system, then a simple download from AutoSave's server puts the device back in production.

# Reduce time and save money

The partnership between Schneider Electric and MDT Software is developed to provide you with an optimized solution for your automation applications change management.

- > Direct access to the Unity and other Schneider applications, for upload, download and compare
- > On-demand or time scheduled compares
- > Historical tracking and automatic notification of changes
- > 21CFR Part11 capabilities: electric records and audit trail, electronic signature
- > Secured access of user, workstation and actions
- > Complete data and system backup and recovery.

## More service with Schneider Electric's worldwide coverage

### > Permanent worldwide availability

With over 5000 sales outlets in 130 countries, wherever you are you can be sure of finding a full range of products to meet your needs and fully compliant with the standards in your country.

### > Technical support

Wherever you are Schneider Electric provides technical support around the world. What's more, Schneider's experts are at hand to work out a customized solution with you.

As the inventors of change management and programmable device support (PDS) software, MDT Software has consistently delivered innovative solutions that are now considered benchmarks of excellence in industrial automation. MDT Software's goal is to deliver innovative software that propels businesses to new levels of performance and profitability. MDT Software is a PDS company who is independent from the hardware and programming software vendors, always innovating and aware of industry trends and standards. Today, thousands end users in a broad variety of industries worldwide have made AutoSave software their response to the challenge of effectively managing an increasing quantity and array of software on the plant floor.

*MDT Software is headquartered in Alpharetta, GA USA.*
