RL RED LION®

EXCELLENCE. REDEFINED.

UNLIMITED FLEXIBILITY MEETS UNYIELDING SECURITY

Introducing a massive leap forward in secure remote access: Red Lion's Secure Remote Access routers and software. Lower your operational costs by centralizing your equipment management, and reduce your downtime by quickly responding to critical alarms and events from anywhere. These next-generation remote access solutions meet the most intense, high-security demands of modern industrial applications. Red Lion's remote access routers offer plug-and-play simplicity for quick setup of low and high-volume deployments. Leaping ahead of the curve has never been so easy—or secure.

Start modernizing your workspace today: redlion.net

Access your equipment remotely and securely for diagnostics and maintenance

Get started in under two minutes with our hassle-free set-up process

Quick and effortless deployments for low or high-volume applications

Realize the benefits of IIoT without worrying about data loss or unauthorized access
