copyrights
are proof of our groundbreaking innovations.

Schmalz is the Market Leader in Vacuum Automation and Ergonomic Handling Systems.

The Handling Systems unit offers innovative handling solutions with vacuum lifters and crane systems for industrial and handicraft applications. The wide range of products in the Vacuum Automation unit includes individual components such as suction cups and vacuum generators, as well as complete gripping systems and clamping solutions for holding workpieces, for example in CNC machining centers.

Our products are used in different applications for example in the logistics industry, the automotive industry, the glass industry and in furniture production.

With comprehensive consulting, a focus on innovation and first-class quality, Schmalz offers its customers long-lasting benefits. Schmalz's intelligent solutions make production and logistics processes more flexible and efficient, while also preparing them for the increasing trend toward digitalization.

Handling Systems

Lifting systems and cranes

Maximum Ergonomics and Productivity with Schmalz Handling Systems

250
picks

per hour with the tube lifter JumboFlex.

Our Handling Systems enjoy wide use in a range of industries:

- Automotive
- Chemicals and pharmaceuticals
- Food and beverages
- Glass
- Logistics
- Packaging
- Sheet metal and metal products
- Solar
- Timber
- Wind energy

Workplace ergonomics and employee productivity are closely linked. People need assistance in handling loads, especially when these loads are moved manually. Schmalz Handling Systems make this possible. Our intuitive and easy-to-use vacuum lifters help employees to reduce the physical strain caused

by the many repeated movements involved in production, assembly and logistics processes. This contributes to improving employees' health and allowing them to conserve energy. The faster handling made possible by our solutions also accelerates material flows and leads to increased productivity.

Our Services and Expertise Make the Difference

“We take service seriously – all over the world.”

Our services for Schmalz Handling Systems:

- On-site consulting – worldwide
- Schmalz Test Center
- Assembly and start of operations
- On-site training at the customer's location
- Auditing for compliance with accident prevention regulations
- Repair service

In addition to optimal system solutions, we also offer comprehensive services, from planning and system design to mounting and start of operations. Our system consultants and service technicians are there when you need them, all over the world. We know the details that really matter, and we are familiar with the specific challenges of a wide range of industries.

Tube Lifters Jumbo: Assistance for Ergonomic Handling

“We take workplace ergonomics seriously.”

Employ Schmalz Handling Systems for:

- Ergonomic working environment
- Safety without compromises
- Increased productivity

Our tube lifters are designed to provide powerful assistance for manual handling tasks. The tube lifter Jumbo is the ideal assistant for machine loading and for shipping and picking applications. It can ergonomically move loads – for instance cardboard boxes, sacks or wooden boards – of up to 300 kg quickly, precisely and in any orientation.

Lifting Devices VacuMaster: Heavy Loads Made Easy

20
tons

can be loaded into sheet metal processing machines in a single shift with VacuMaster.

Whether it's metal sheets, wooden boards, plastic sheets, barrels, windows or glass sheets – the VacuMaster tackles even the heaviest goods weighing up to several tons. For applications where many hands would normally be required, the VacuMaster allows for effortless handling by a single operator while protecting the employee's health.

Aluminum Crane Systems: Responsive Overhead Assistance

Schmalz aluminum crane systems are designed to work perfectly with our vacuum lifters. The light series of crane can lift up to 1,200 kg and can also be used as a stand-alone system. Whether as a jib crane or a crane system, our modular system enables perfect integration into your working environment.

60 percent

less energy expended when users lift loads with our responsive aluminum crane systems.

The perfect addition to the timber industry:

Our clamping solutions allow for reliable machining and processing.
