

NEW SiteManager™ 1149 and 3349 with integrated WiFi

World class flexibility in your new SiteManager

With their integrated WiFi option these new SiteManagers offer you the greatest flexibility the market has seen to date.

Use the WiFi for connecting to the Internet via a local access point or to operate the device as a WiFi access point via an external USB WiFi adapter.

Optionally access the Internet via a standard 4G/3G/GPRS modem* installed in the USB port.

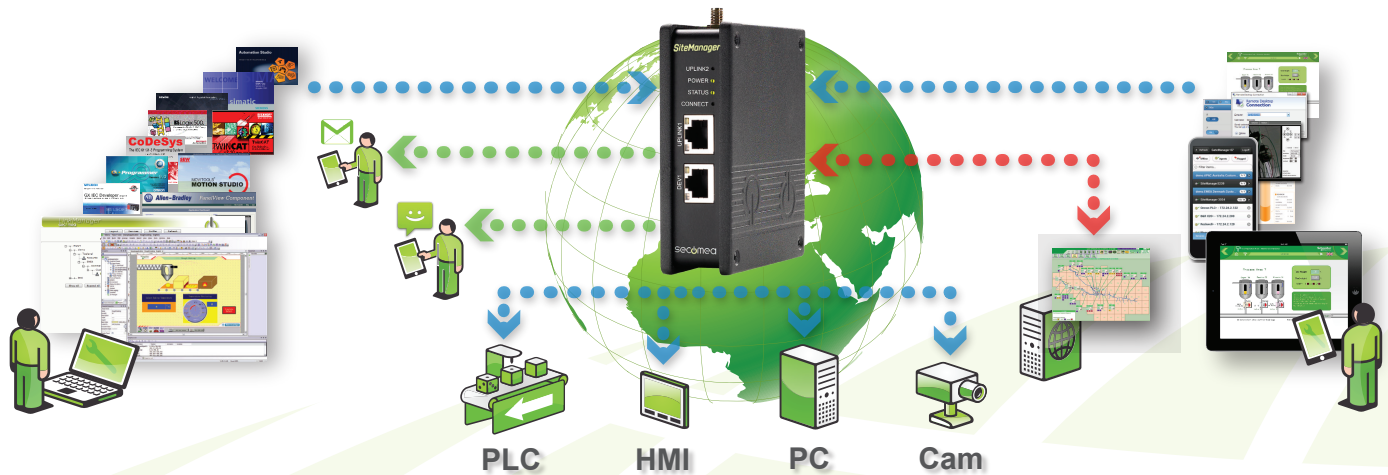

* (Available from release 6.0, Q2 2015)
