RELEVANCE LOCATION-BASED MOBILE SOLUTION

Easily add location-based functionality to your ThinManager installation.

MUNICI-PACK LICENSING

This licensing model allows for municipalities to allocate their licensing across multiple sites and facilities within a single municipal jurisdiction.

REDUNDANCY

ThinManager offers 2 options for redundant servers:

Mirrored Redundancy synchronizes a pair of servers, one acting as a primary server while the other acts as a "view only" interface.

Full-Redundancy uses a redundant pair of servers storing configurations on both with a fully accessible ThinManager GUI.
