

ThinManager®

# MULTI MONITOR

Up to 5 Monitors.  
Countless Configurations.  
Touchscreen Support.

SPAN A SINGLE SESSION ACROSS MONITORS,  
DISPLAY A DIFFERENT SESSION ON EACH MONITOR,  
OR PRESENT A COMBINATION OF THE TWO.

ThinManager Ready thin  
client with 5 video ports

2 monitors spanning  
a single application

3 monitors showing  
individual sessions

Increase visualization  
and expand your view  
by displaying individual  
applications on their  
own monitor or span  
large applications  
across several monitors  
through a single  
terminal.

MultiMonitor allows ThinManager users to display up to five screens on a single thin client. MultiMonitor can be used to span sessions across monitors and/or run individual or multiple sessions on each monitor. Touchscreens are also supported.

Users can place monitors at any location within the virtual space and can even combine spanning and multiple sessions on a single thin client. Users can use two adjacent monitors to span a single session while two other monitors are each used to display sessions running on other servers. Wizards make configuring all of the screens a snap.

MultiMonitor supports spanned resolutions up to 8192 x 8192 with 64K colors for MS Server 2012 and newer. MS Server 2008 and prior are limited to a spanned resolution of 4096 x 2048.
