Mounting instructions

Screw the self-locking nut on the actuator screw and then the actuator screw in the manual valve (1).

Mount the jumper bottom part on the manual valve (2).

Screw the jumper top part on the bottom part with the M6 x 10 screws and use the serrated lock washers for this purpose. The height of the jumper top part can be adjusted to the height of the valve resp. actuator screw in 10mm increments (3 and 4).

Adjust the actuator screw to the height of the jumper top part and screw the self-locking nut downward to fix the lever (5).

Actuator (puck) and sensor can now be mounted (6).

Please check the correct function of the position feedback.
