Heavy Payload

Smaller. Faster. Stronger

Avoid injury or accidents caused by lifting heavy items and add speed to your process by automating with UR's newest collaborative robot.

More torque

Fast screw driving

The UR30's high torque joints and force torque sensor allow for straight, consistent screw driving even in areas difficult for humans to reach.

 **Payload:** 30 kg

 **Reach:** 1300 mm

 **Footprint:** Ø 245 mm

 **Weight:** 63,5 kg

Small footprint

Consistent fit and finish

The UR30 takes up the same space as a human and can easily handle the repetitive speed required for sanding or deburring without the associated health risks.
