

ROBOT2CNC BASIC EDITION

Robot2CNC simplifies the integration of a robot to a CNC machine. Robot2CNC allows the robot program to select and execute programs stored on the CNC control and notify the robot program when the CNC program is complete. Robot and CNC programming are simplified and the chance for expensive operator errors during change over are reduced. All required cabling and detailed instructions are included. For Universal Robots, the included URCap makes CNC automation programming easy and fast.

V E R S A **B** U I L T
R O B O T I C S

FEATURES

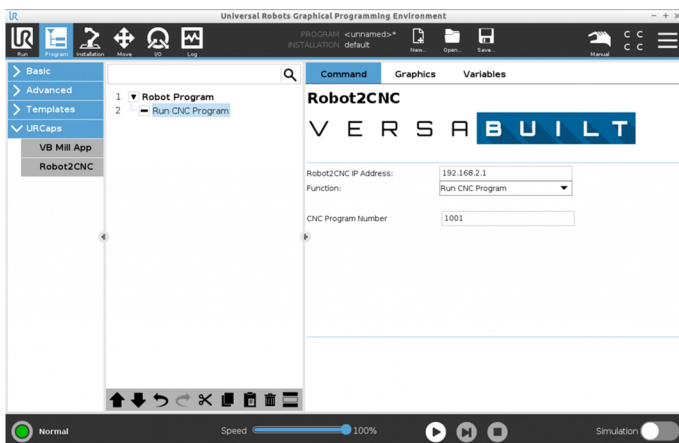

- Select and change CNC programs from the robot
- Cycle-start CNC from the robot
- Verify CNC program completes successfully or generates an error
- Common interface to all supported CNC controls simplifies programming
- Bi-directional communication between the robot and for custom programming
- Includes URCap to simplify programming with Universal Robots
- Haas Cell Safe Signal support simplifies actuation of lathe chucks and tailstocks (NGC only)

INCLUDES

- Robot2CNC computer
- Ethernet cables
- 5-port Ethernet switch
- Serial Interface (Haas Legacy Only)

HIGHLIGHTS

- Mounts in CNC cabinet
- Support for Haas NGC, Haas Legacy, and Fanuc CNC controls
- Easy setup and validation from URCap
- Built-in remote support
