

XPLORE[™]
THE RUGGED TABLET AUTHORITY[™]

XPLORE RUGGED TABLETS

MISSION CRITICAL MOBILITY

**Going Above and Beyond
the Call of Duty
Since 1996**

Successful operations necessitate constant preparedness and situational awareness. Both are contingent on the availability and proper utilization of real-time data during dispatch, incident response, and investigations. All require a certain level of computer durability, connectivity, and true mobility. When your job is to keep crews safe while simultaneously protecting the people and interests of the communities you serve, your response should be driven by an Xplore rugged tablet solution inside and outside the vehicle.

Partner with Xplore Today, Be Prepared for the Future

Protect Your Mobility Investment

Did you know Xplore rugged tablets have a lower total cost of ownership and greater return on investment long term than non-rugged devices and other rugged devices? iPads, laptops, and other mobile PC form factors don't lend themselves to mission-critical mobility. They're either lacking the rugged protection, long-term platform stability, software flexibility, or reliable connectivity that always comes standard with every Xplore rugged tablet solution.

1%

XPLORE FAILURE RATE

On average, Xplore rugged tablets last 3-7 years despite the harsh wear-and-tear common in public safety. Some Xplore rugged tablets also fall well below industry averages, with some boasting a <1% failure rate."

Plus, all Xplore rugged tablets come standard with a 3 year limited warranty, with additional extended warranty and xDefend programs available for most tablet PCs and accessory components.

Wirelessly Connect with Your Past, Present, and Future

No matter what challenge you face on the job, you'll always have a direct line to your team – and the real-time data that informs your collective decisions. Xplore rugged tablets are capable of communicating via 4G LTE, WiFi, cellular, and Land Mobile Radio (LMR) networks today. And we'll be ready to connect to FirstNet and Band 14 in the near future. We even have push-to-talk (PTT) app providers on standby to bridge the gap.

Field Proven to Meet Public Safety's Most Stringent Mobility Requirements

Your crews rely on real-time data access and communications to respond quickly and safely to every call – and to complete incident investigations without issue. That's why they need an Xplore rugged tablet within reach at all times. Unlike notebooks and handhelds, Xplore rugged tablets are genuinely mobile yet provide the same industry-leading performance, protection, and connectivity as every other form factor.

Why Xplore Rugged Tablets are Right for You

True Mobility

Lightweight; multiple carrying options; one-hand grab-and-go vehicle/desktop docks

Uninterrupted Connectivity

All I/O ports, all the time (USB, True Serial, HDMI IN); multiple built-in comms

Back Office Compatibility

Genuine Windows® OS; Android™, Computer-Aided Dispatch (CAD), Remote Management Systems (RMS), Body Camera Streaming

Easy Data Entry

Digital/Wacom Pen, Barcode Scanner, Mag Stripe Reader, RFID; Built-in Cameras, Wireless Keyboards

Top of the Line Safety

Intrinsically Safe (C1D2/C1Z2/ATEX) for Hazardous Locations

The Most Complete Line of Accessories

Secure Mobile Docks for In-Vehicle, Desktop; Second /Hot-Swap Batteries; Work Anywhere Kits

Powerful and Future Ready

Intel® Core™-Series Processors; SSD; Expansive Storage and Memory; GIS; Internet of Things

Unrestricted Usability

MIL-STD-810G; IP54/65/67; Outdoor readable/night dimming; extended-life batteries

Government-Mandated Security, Multi-Layer Authentication

TPM 1.2; Fingerprint Scanner; Encryption Smart Card/CAC; CJIS; HIPAA

Engineered to Work as Perfectly In the Vehicle As They Do in the Field

Situational awareness is essential in-vehicle. So is safety. That's why Xplore built the most comprehensive set of ergonomic MDT systems for public safety fleets. And why we work with partners to design and install custom-fit solutions into every "official use" vehicle make and model. Want a flush, pole, console, or side mount? Adjust the height or angle of a docked tablet? Add a keyboard tray? We'll ensure it's perfect down to the last screw.

Xplore partners with Gamber-Johnson, Havis, Mobile Mounts and others to design and install custom-fit solutions into every "official use" vehicle make and model on the market.

Xplore Rugged Tablets are Purpose-Built for You

Always Ready, Able to Support Evolving Workflows

You can be confident that Xplore's ruggedized tablets will run all of your critical software, enable constant communication with other in-vehicle electronics, and deliver immediate intelligence that allows for real-time, informed-response coordination between all police, fire and rescue, and EMS partner agencies during emergency response and management operations.

We Know that No Two Mobility Strategies or Solutions Are Exactly the Same

Xplore designs and deliver rugged tablet platforms that are both adaptable and expandable, and then we help you find a feature combination that's ideal for every one of your workflows. That's why agencies worldwide have partnered with Xplore to mobilize their operations in the vehicle, in the field, and in the office, including:

Ticketing & eCitations	Dispatch and Routing (GPS)	ePCR/EHR
Evidence Documentation	Fire and Building Inspections	Mapping/GIS Asset Location
Safety Audits and Compliance Reporting	Emergency Response Planning and Management	Maintenance and Repair Scheduling and Completion
Investigations	Situational Awareness	Incident Reporting

But don't just take it from us. Talk to some of our customers:

"With these tablets we're getting more bang for our buck, as well as features we need."
- Mount Lebanon Fire Department
