

## **InTouch New Features 2020**

The class demonstrates many new features that have come out since version 2012 and on up to 2020. These features can enhance development or runtime operations whether we're doing tag database management, graphics, troubleshooting data acquisition, or providing new methods for data presentation.

1. Tag Viewer
2. Industrial Graphics (no DB)
3. SMC diagnostics filtering
4. Historian push MDAS
5. Read/Write and Read Only
6. OI servers like web service, mqtt, opc-ua
7. Frame window
8. Window templates
9. Application templates
10. Convert classic window to Industrial Graphic
11. InTouch Web Client

### **Audience**

Those who have used InTouch from both runtime and development standpoint and seek to know how they can use features to save time and effort.

### **Prerequisites**

Have used InTouch WindowMaker extensively or have taken the class.
