

Technical Support Engineer

Logic, Inc. is currently seeking applicants for the position of support engineer. Our Technical Services team are individuals that provide technical support across a spectrum of industrial software and hardware products, including both pre- and post-sales design and engineering. It requires both technical knowledge and customer service skills. Individuals must be able to learn many types of software quickly and be able to communicate both concepts and details.

The Position – Technical Support Engineer

The focus of this position is application support associated with Logic, Inc. customers using industrial software and hardware products in manufacturing and process facilities including HMI/SCADA, PLC programming, motion, variable-frequency drives, and robotics.

- Responsibilities include learning real-world applications for the use of products, formal and informal training
- Creating and preparing technical demonstrations along with on-site support and application engineering.
- Experience in manufacturing and/or process is a definite advantage.
- Required degree in Engineering, Computer Science or equivalent field.

Experience with Microsoft OS products, SQL Server, Visual Studios .NET, networking, and security is necessary. Linux experience is an advantage.

General Skill Requirements

- **Learn Quickly** - this includes new technologies, new software, new communications options, and new manufacturing processes.
- **Conceptualize** - ability to listen to technical requirements and conceptualize how these would be met with our current products.
- **Problem Solve and Troubleshoot** – the ability to ask the appropriate questions to find the root cause of an application problem and know when to escalate an issue.
- **Verbal** – ability to explain technical concepts and details such that people clearly understand what you are trying to convey.

Personal Characteristics

- **Good Communication Skills** – we are a service organization and as such our value is in understanding the customers' needs and explaining our solutions to meet those needs.
- **Enjoy People** – to be successful you must enjoy working with many different types of people. This job may require you to be more outgoing than your natural inclination.
- **Team Member** – everyone within Logic, Inc. works together towards the common goal. This is a core value to our company. You will need to meet other's requests, request others to do things for you, and respond positively to customers. Simply put, treat others as you wish to be treated.
- **Self-Managing** – we do not micro-manage your work life. You must be able to manage time effectively, organize your material, and perform quality work without constant supervision.
- **Objective Perspective** – for customers we are the manufacturer's advocate, but to manufacturers we are the advocates for the customer. This does require a certain amount of objectivity for both parties.
