

# Join Us for a One-Day Training Event!

## We are THE Industrial Data Company™

At this training you will learn how Red Lion products address a variety of industrial challenges from providing **remote access** and monitoring to **integrating new equipment into existing infrastructure**. This one-day event includes product **overviews**, application **examples**, and a multi-product **hands-on** component. Removing barriers to your data in 3 powerful ways: **Access**, **Connect** and **Visualize**

### The following products will be covered in this training event:

- FlexEdge DA-70A equipped with one I/O module, Wi-Fi, & Ethernet Sleds
- NT5000 Managed Switch
- Graphite HMI including Control & I/O Module
- PM-50, Graphical Panel Meter
- RA70, Remote Access Router

## Connecting Customers to Their Data

### Access Your Data

- Learn how to easily deploy remote access, gain connectivity to remote assets.
- Red Lion's extensive industrial driver portfolio ensures reduced cost, overhead, and risk when incorporating new components into existing infrastructure.
- Using protocol/media conversion you'll configure and learn how legacy products can seamlessly be connected to new products demonstrating easy-to-use Crimson software.

### Keep Networks Connected

- Keep your Network Connected and Protected with Red Lion's N-Tron Series NT5000.
- Discover how RL Managed Switches provide Ease-of-Use, Reliability, and Security to maximize operating performance and system uptime.
- Create a Smart Industrial Network that can alert on potential network issues; preferably before they cause production downtime.
- Seamlessly connect multiple stranded devices to a Smart Industrial Network.
- Easily configure a fault tolerant redundant network.

### Visualize Your Data Onsite or Virtually

- Learn how to gain data insights through Visualization.
- Using common OEE methods, learn how to increase productivity by monitoring and displaying operational data.
- Learn how to store that data in the enterprise network.
- Learn how you can extend local visualization to the Cloud using the Red Lion's IIoT features and build a telemetry solution that offers remote connectivity with security and ease of use at its core.
- Configure graphics and evaluate the Web Server functionality – Virtual HMI.

Maximize the return on investment  
Empower your workforce  
Identify opportunities for reuse  
Save time when troubleshooting

**Logic is offering this one day training class FREE at five locations.**

**Click the date and location that best fits your schedule and register today.**

May 7th & 8th 9:00am - 3:30pm

St. Louis  
6085 Fee Fee Rd.  
Hazelwood, MO 63042

May 21st & 22nd 9:00am - 3:30pm

Kansas City  
890 N. Martway Ct.  
Olathe, KS 66061

July 9th & 10th 9:00am - 3:30pm

Springfield  
636 West Republic Road  
Suite B108  
Springfield, MO 65807

July 23rd & 24th 9:00am - 3:30pm

Wichita  
2829 N. Regency Park  
Wichita, KS 67226

August 6th & 7th 9:00am - 3:30pm

Omaha  
14216 Dayton Circle  
Suite 16  
Omaha, NE 68137
