# Collaborative Robot Accessories

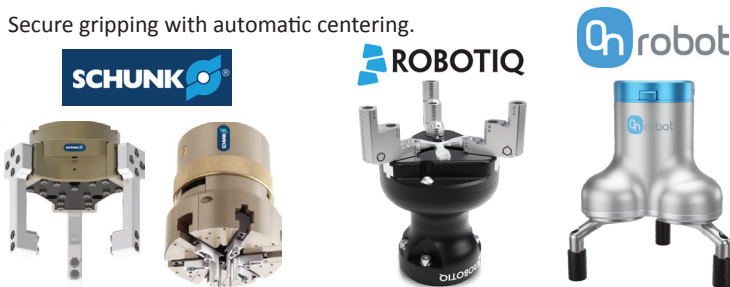

## Two-Finger Grippers

Servo-driven or pneumatic.

## Three-Finger Grippers

Secure gripping with automatic centering.

## Vacuum Grippers

Built for flat-surfaced parts – sheet metal, plastic, corrugate. Common for palletizing.

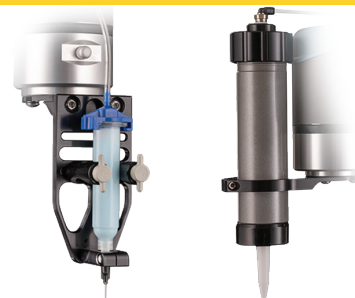

## Magnetic Grippers

Handles ferrous metal with mesh or complex geometry where vacuum isn't an option.

## Dispensing

Cartridge, syringe, and two-part epoxy options.

## Screwdriving

Precise torque control and data logging. Cross-threading error detection.

## Sanding

Cobot force functions allow the robot to adapt to slight part differences while maintaining consistent pressure.

## Tool Changing

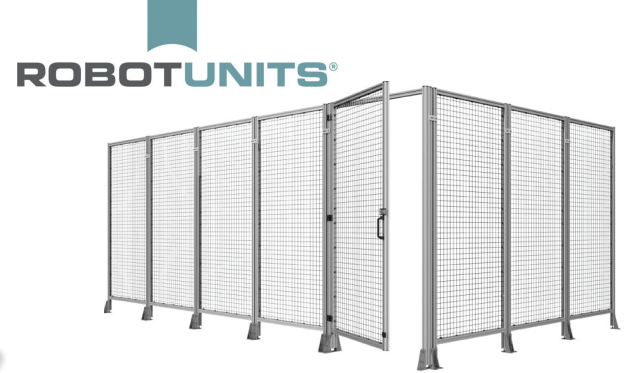

Perform multiple tasks without manual changeover. Electric and pneumatic pass-throughs keep cables organized.

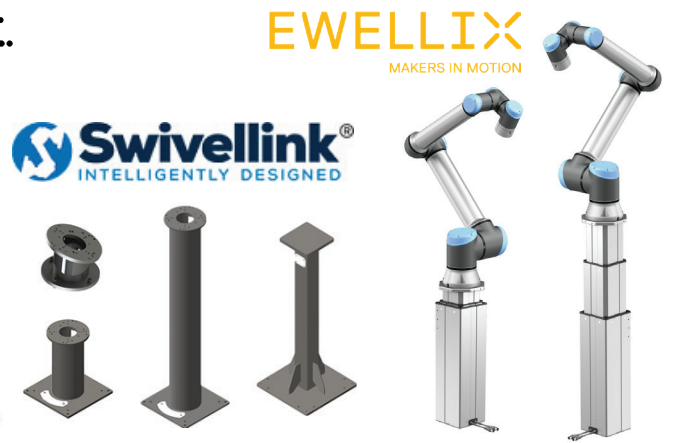

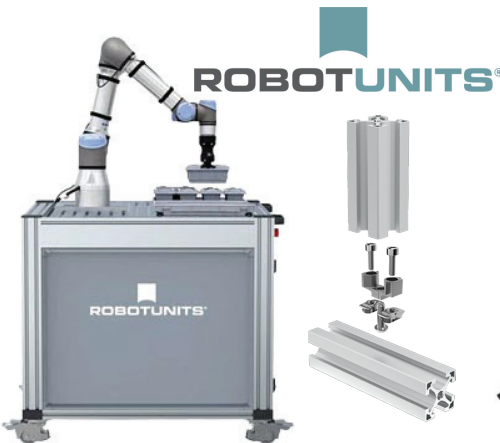

## Vision

## Safety

## Mounting

## Motion
