

# Longwatch™ OMI App

## Video Application for AVEVA Operations Management Interface / OMI

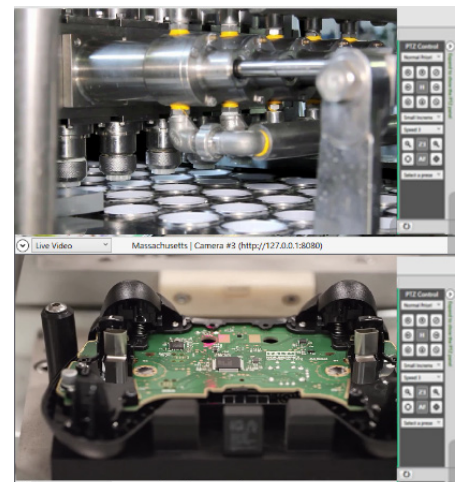

- Easily create live video windows
- On-screen PTZ controls including presets
- Contextual switching for any camera feed
- Built-in DVR playback

### Display video in AVEVA Operations Management Interface (OMI)

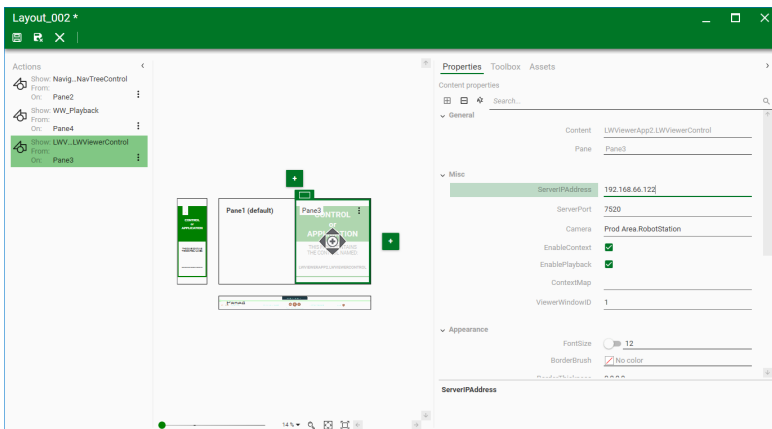

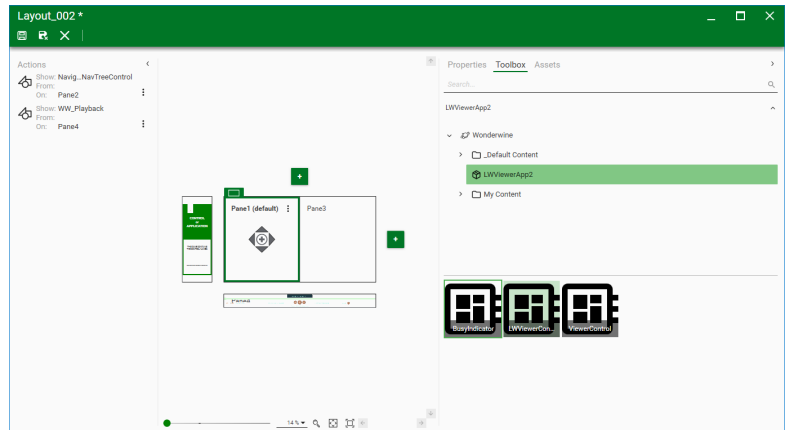

The IVC OMI Video App is a software application that lets you drop in live and stored video windows and camera controls into your OMI environment. It interfaces seamlessly with your video system so you can easily view and control cameras that are deployed throughout your operation. Embed live IVC or third party ONVIF IP cameras for new or existing camera systems.

With the IVC OMI Video App, operators get a complete picture of what's happening throughout their process from within the AVEVA OMI.

# Embedding live and DVR video into AVEVA OMI is easy with Longwatch

Drag & drop camera objects into the layout

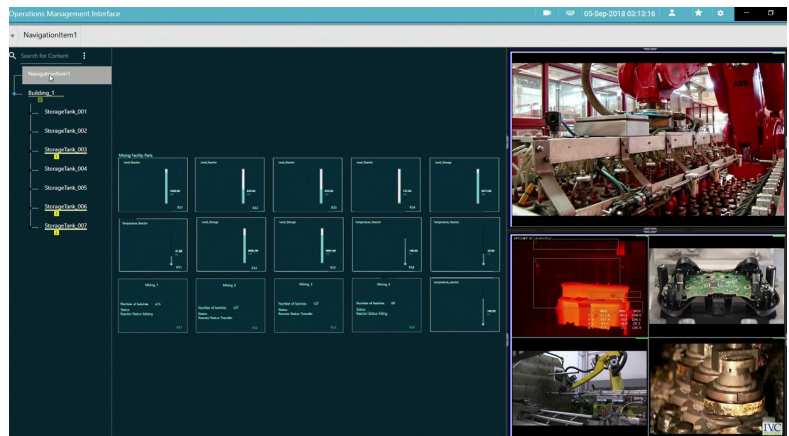

Assign properties to camera objects:

- VCC IP address
- Camera
- Object context
- Enable playback of saved video

Live & saved video with controls:

- Live video windows
- PTZ controls with presets
- Contextual switching
- Built-in DVR playback
