

Mobile IntelTrac®

Accelerate Your IntelTrac Implementation

IntelTrac Assessment Program

The IntelTrac Assessment Program is a 2 day assessment to evaluate site readiness for an IntelTrac implementation. Front end studies include all site assessment activities as well as, assisting with your value justification for an IntelTrac implementation.

IntelTrac Quick Start Program

The IntelTrac Quick Start Program is a focused consulting engagement which will have IntelTrac up and running in your facility in 30 days*.

This unique IntelTrac Quick Start program delivers a complete system, rather than simply a rapid prototype or “proof of concept”, and includes configuration and implementation of all major IntelTrac Modules with training for your project team.

Helping Your Front Line Manage Your Bottom Line

Mobile IntelTrac is a complete disconnected intelligent solution that enables the mobile worker to complete their job. Mobile IntelTrac supports a number of key application areas today including: operator rounds, safety and regulatory inspections, process safety management inspections and general data collection. The applications are all highly user centric and intuitive and easily guide workers through a question and answer process which helps uncover hidden bottlenecks and identify problems in a timely manner.

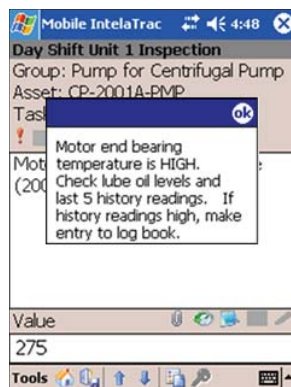

A Mobile Management System That Works Better

The IntelTrac software suite ties the field operator directly into the automation loop by utilizing a combination of workforce management software, mobile handheld computers, monitoring devices and Radio Frequency Identification (RFID) equipment tags or bar codes. The result is a significantly improved decision support system for managing plant assets.

As a key component of the IntelTrac software suite, Mobile IntelTrac provides the ability to:

- Perform pre-defined, guided, scheduled or impromptu inspections
- View historical information with graphs of previously collected data points
- Select from pre-defined pick lists for completing tasks
- Validate data and create exception reports with time/date stamps
- Capture field worker signatures for surveillance auditing purposes
- Attach notes and view documents
- Maintain a virtual log book
- Deliver focused advice on ‘out-of-tolerance’ readings from pre-defined actions
- Create work requests manually or based on a pre-defined action
- Operate in connected and/or disconnected mode
- Define security schema to protect data & ensure authorized usage

Providing intelligent guided advice for your field workers, Mobile IntelTrac alerts operators and technicians of abnormal conditions during the inspection process. The system provides corrective actions through criticality alarming and detailed notes. The application guides workers through additional steps or actions that must occur.

A Robust and Secure Solution

The Mobile IntelTrac system has embedded administration and security features for managing users and their access to scheduled procedures. The IntelTrac system is designed to meet the security needs of managed corporate networks by effectively fire walling mobile users from unauthorized corporate systems.

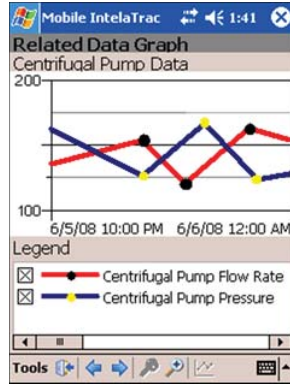

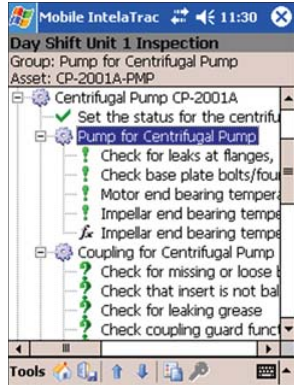

Critical Information at your Workers' Fingertips

Mobile IntelTrac enables the presentation of historical asset trend information to inform operators of deviations and ensure they have

Software Solutions for Real-Time Success™

the historical information necessary to prevent asset failures before they occur. In addition, Mobile IntelTrac includes a document sharing feature that allows operators to view policies, procedures and graphs to make informed decisions.

Seamless Integration to your Back-End Systems

The IntelTrac system has a robust integration layer that enables it to interface seamlessly with market leading ERP systems, such as SAP and Maximo. This integration enables the exchange of information including; work orders, measurement points, notification requests and the exchange of asset related information. In addition, IntelTrac also provides integration with market leading data historians such as PHD (Honeywell), PI (OSISoft) and others.

Built on Best in Class Microsoft Technologies

IntelTrac is built on the latest Microsoft technologies, ensuring a secure, robust and scalable solution that integrates seamlessly with your existing environment. Mobile IntelTrac runs on Windows Mobile devices with the following operating systems:

- Windows Mobile 2003
- Windows Mobile 5
- Windows Mobile 6
